

2022 ELITE ARCHERY

# SHOOTABILITY

SHOOT·ABIL·ITY

**NOUN**

Shootability is the collective shooting experience and overall ease of use when it comes to drawing, aiming, holding and executing a shot that elevates an archer's proficiency which leads to greater confidence and increased success.

EXPERIENCE THE WORLD'S MOST SHOOTABLE BOW  
& TAKE THE SHOOTABILITY CHALLENGE TODAY

Use **#ShootabilityChallenge** on Facebook and/or Instagram to share your experience shooting an Elite bow for your chance to be featured and WIN weekly prizes!

# S.E.T. TECHNOLOGY SIMPLIFIED. EXACT. TUNING.

Poor arrow flight is one of the most common issues archers experience that affect accuracy; and many don't even realize it. Often, field points will fly fine while broadheads don't. Elite Archery's S.E.T. Technology™ (Simplified. Exact. Tuning.) eliminates the frustrations of tuning a bow by allowing the user to micro adjust the limb pivot angle which changes the position of the cams (the lean) as well as the lateral position (centershot) to optimize arrow flight which ultimately increases accuracy.

NEW 2022

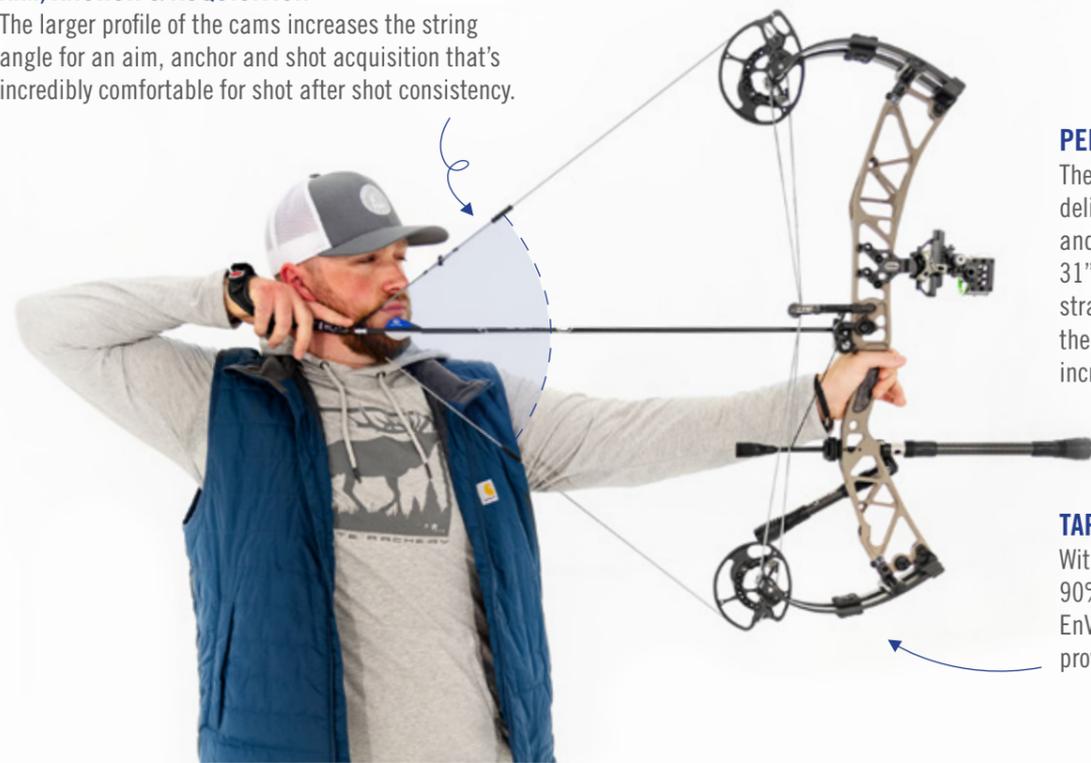

## IMAGINE AN ENHANCED SHOOTING EXPERIENCE THAT INCREASES YOUR ACCURACY, CONFIDENCE & STEALTH LIKE NEVER BEFORE- ENVISION™ SHOOTABILITY.

For 2022, we challenged the rules – in fact, we threw out the rule book on what a bow *should* look like – and envisioned what the shooting experience *could* feel like. The 2022 EnVision™ integrates a target inspired design into a compact, stealthy and deadly hunting rig. With wider limbs and a longer, straighter riser, the EnVision™ strategically positions the weight over the grip, and behind the shooter for a balanced and rock-solid platform. The nearly 7 inch brace height will leave you experiencing new levels of accuracy while the ASYM Tri-Track Cam System with Versa Performance Mod ensures downrange devastation with speeds reaching up to 334 FPS. Featuring NEW Vibration Reduction Technology (VRT), the EnVision™ stifles noise and virtually eliminates residual vibration. With increased Mountain Series offerings, the EnVision™ also features a 75 pound limb option and new finishes including Mountain Tan & Sienna Brown.

### AIM, ANCHOR & ACQUISITION

The larger profile of the cams increases the string angle for an aim, anchor and shot acquisition that's incredibly comfortable for shot after shot consistency.

### PERFORMANCE PLATFORM

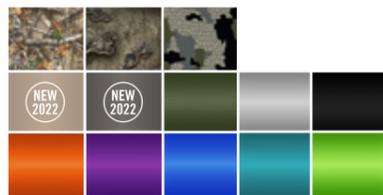

The EnVision's wider limbs delivers ultimate balance to aim and hold with confidence on the 31" platform while the weight is strategically positioned behind the shooter and over the grip for increased balance.

### TARGET INSPIRED

With the riser making up nearly 90% of the axle to axle length, the EnVision's longer, straighter riser provides unparalleled stability.

**S.E.T. TECHNOLOGY**  
Simplified. Exact. Tuning.  
increases accuracy through  
proper arrow flight.

### STEALTH & AGILITY

Compact, maneuverable and stealthy – the EnVision is the ultimate bowhunter-friendly design.

### FITS LIKE A GLOVE

With a narrower throat and wider base, the Precision Grip ensures consistent and repeatable hand placement.

### CUSTOM COMFORT

Micro draw length adjustments of just 1/4" increments, 70-90% let-off and backwall options included give the shooter unlimited options to craft their custom shooting experience.

### ACCURACY FIRST

The nearly 7" brace height is ultra-forgiving and optimizes the shooter's performance for superior accuracy.

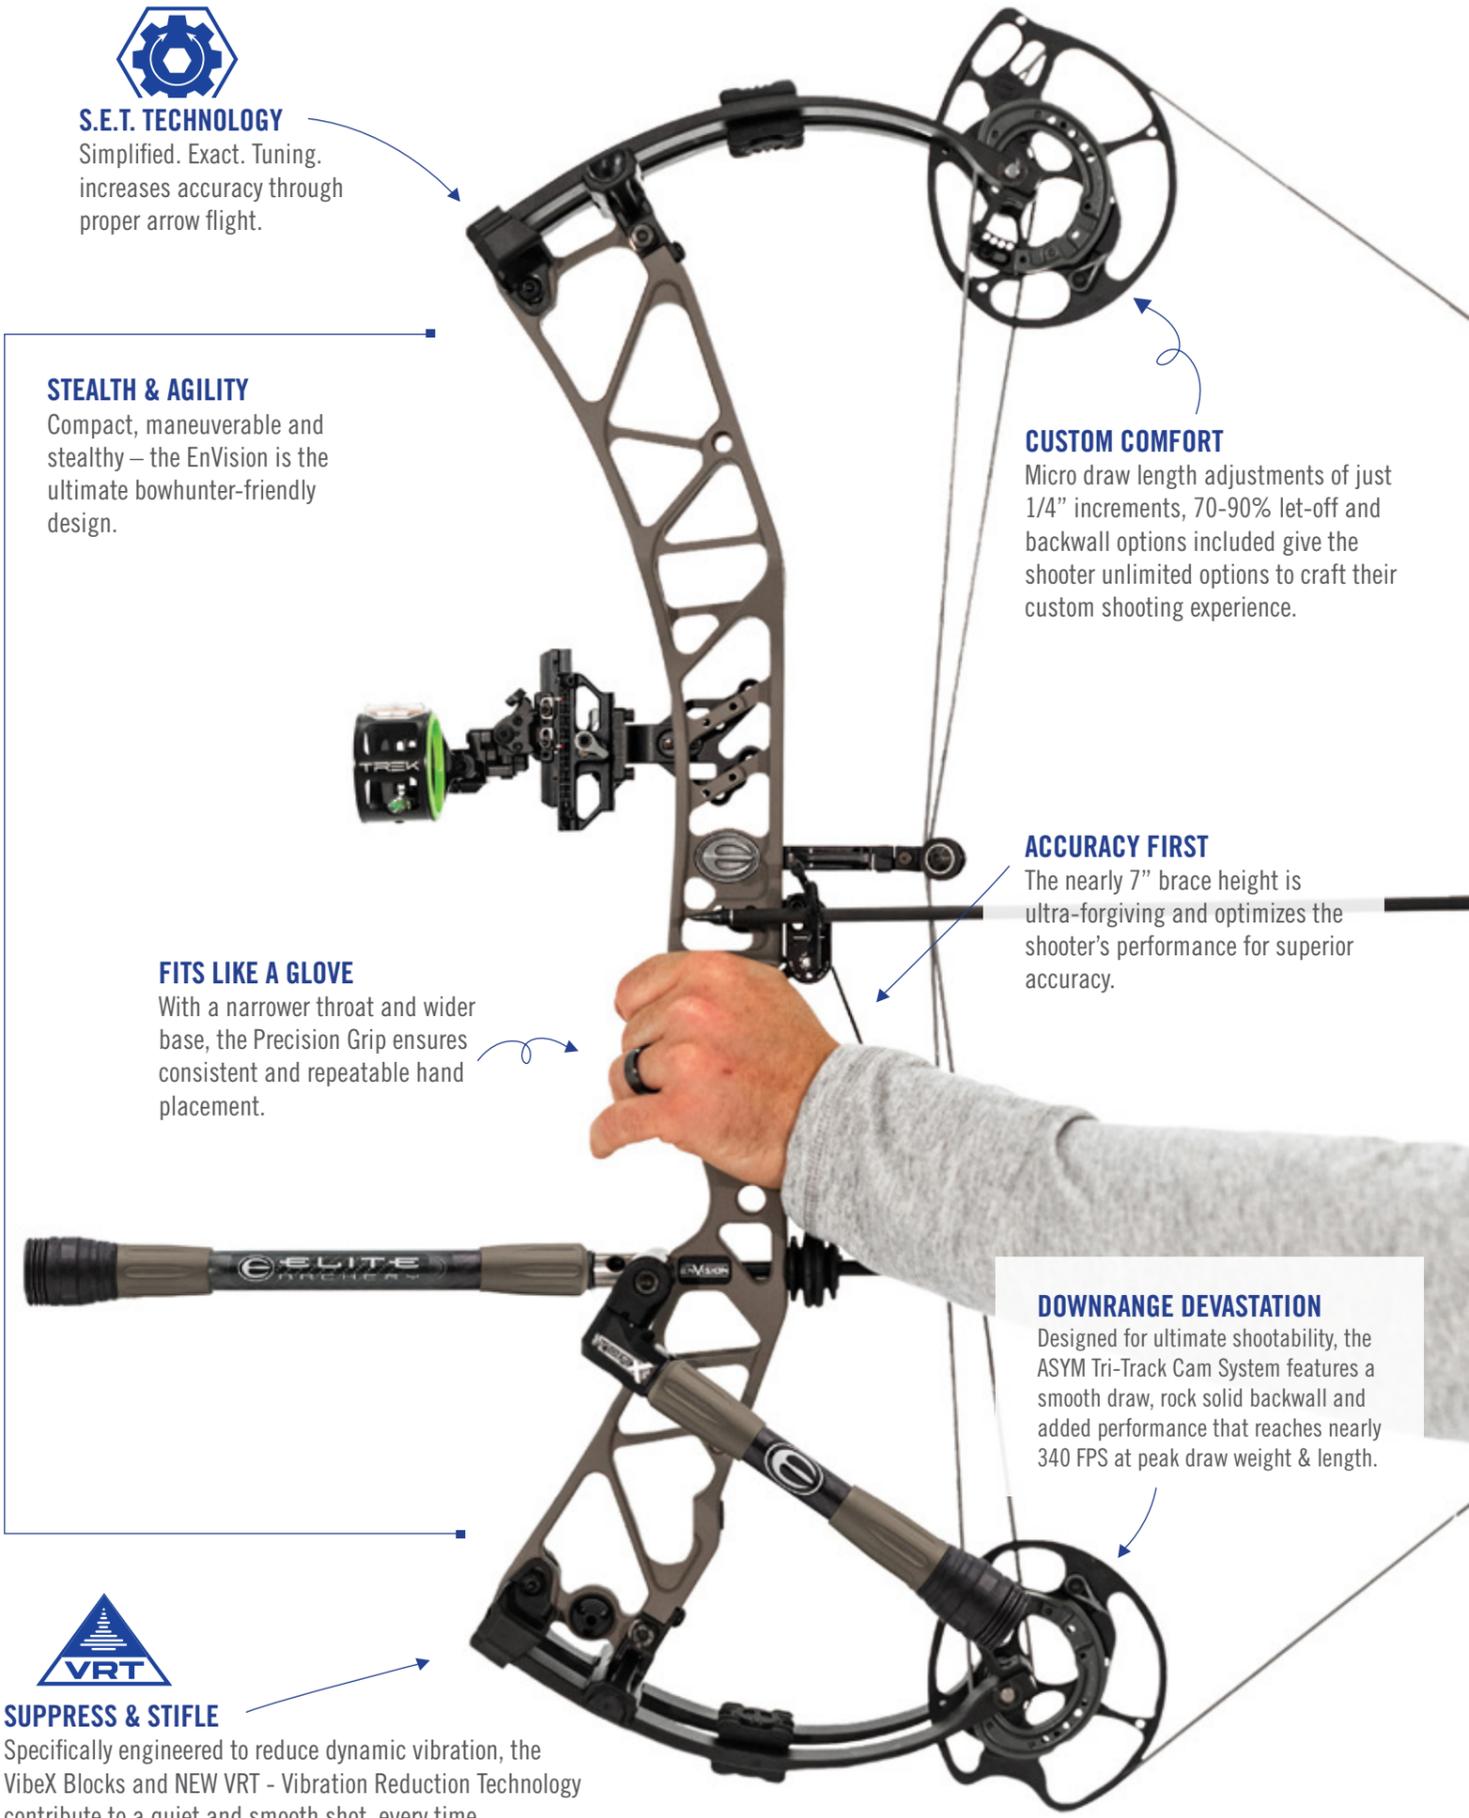

### DOWNRANGE DEVASTATION

Designed for ultimate shootability, the ASYM Tri-Track Cam System features a smooth draw, rock solid backwall and added performance that reaches nearly 340 FPS at peak draw weight & length.

### SUPPRESS & STIFLE

Specifically engineered to reduce dynamic vibration, the VibeX Blocks and NEW VRT - Vibration Reduction Technology contribute to a quiet and smooth shot, every time.

TRENT KLEEGER

# BASIN

## POUND FOR POUND, THE BASIN DEFINES NEW STANDARDS

The Basin was designed to define new standards for bows at this price point. Reaching 70 pounds of draw weight, the Basin goes pound for pound with bows in its class. Like its predecessor the Ember, the Basin doesn't cut any corners in its machined aluminum components and is backed with Elite's Lifetime Warranty and Hunt Guarantee.

# BASIN RTS

NEW 2022

## SHOOTABILITY AT THE READY.

The Elite Ember RTS (Ready To Shoot) package is an excellent entry-level setup for archers of all ages. Completely adjustable from 20 pounds to 70 pounds and 16 inches to 30 inches makes this a great bow for everyone.

**RTS (Ready To Shoot) Package Includes:**

**TACTIC5**  
ULTRA-LIGHT QUIVER  
CUSTOM BOW EQUIPMENT

**TACTIC**  
3-PIN ADJUSTABLE SIGHT  
CUSTOM BOW EQUIPMENT

**ARROW MANE**  
FULL CAPTURE REST

**AFFECT**  
COMPACT CARBON STABILIZER  
CUSTOM BOW EQUIPMENT

# ENKORE

## SHOOTABLE SPEED.

As a follow up to the wildly popular Elite Kure, the 33" axle-to-axle EnKore will satisfy the speed needs of many archers. With an IBO rating of 340 fps, the EnKore utilizes Elite's ASYM Tri-Track Cam System and S.E.T. Technology to make tuning easy and frustration-free.

The EnKore features a newly designed Performance Versa Mod System which offers 90% let-off and generates increased speed. Offering the best of both worlds, the EnKore features the comfort and shootability that an Elite is known for but with added performance. You'll be surprised at what a bow shooting 340 feet per second *can* feel like.

P.J. REILLY | OUTDOOR LIFE BOW REVIEW

# REMEDY

## SHOOTABILITY REFINED.

The Elite Remedy combines the ASYM Tri-Track Cam System, Versa Mod rotating module, and S.E.T. Technology into a 34" axle-to-axle bow. Designed specifically for those who prefer a slightly longer ATA, the Remedy maintains Elite's promise of a comfortable shooting experience while accommodating longer draw lengths of up to 31". Combined with dual-riser cages and the form, fit, and finish Elite is known for, the Remedy is a smooth-drawing and easy to aim solution.

# EMBER

## SHOOTABILITY FOR EVERYONE.

The fully adjustable Ember brings Shootability to archers of all sizes and ages. Coming in at 31 1/4" axle-to-axle, with a 6 1/4" brace height, the Ember is available in draw lengths from 15"-29" and a draw weight range from 10-60 pounds. At 29" and 60-pounds, the bow boasts speeds of 310 fps and includes some of Elite's hallmark features. The Ember includes Elite's recognizable caged aluminum riser, stainless steel cam bearings, aluminum pockets, cams, and mods. The Winner's Choice string and cables, VIBEX damping blocks and integrated limb stops deliver a solid back wall and a whisper quiet shot.

THE **REZULT 36** WITH **NEW 75% VERSA MOD** IS  
THE **MOST CONSISTENT & FORGIVING** SET UP  
I HAVE EVER SHOT.”

RICHARD BOWEN | PROFESSIONAL ARCHER

# REZULT<sub>36</sub>

## A TARGET ARCHER'S DREAM.

Elite brings a companion target bow model to the market with the new Rezult 36. Featuring Elite's ASYM Tri-Track Cam System, Versa Mod rotating module and Elite's award-winning S.E.T. Technology, the Rezult 36 delivers an impressive IBO speed of 330 fps on a 36" axle-to-axle platform. The Rezult 36 offers increased options, allowing the competitive archers the ability to build a bow that works for their unique shooting style and form with new peak weight ranges of 55 and 65 pounds.

Deduct 2-3 FPS from rating for #60 peak weight (300 grain arrow) \*Draw length and speed measured at 80% let-off. For 90% let-off, add 1/2" to draw length.

# REZULT

## THE REZULT IS ACCURACY.

The Elite REZULT delivers a game-changing set of technologies that - combined - puts professional performance and tuning options into the hands of every day archers. Designed and developed by professional archers, the REZULT tunes faster and easier, saving time and leaving frustration at the door. Built for any shooter looking for a bow that delivers the real deal, the REZULT is here.

# TEAM ELITE

As an Elite Team, these shooters demand excellence every time they step onto the shooting line. Knowing that their next arrow could result in a big payout means the Elite Team requires ultimate confidence and trust in their equipment when it matters most. Likewise, you can expect that same level of trust for your bow to perform flawlessly -- no matter what your query.

## GARAGE SIGNS

Whether it's in your home gym, office, or garage - this high-quality, embossed, all-metal sign and is sure to look great anywhere.

# CUSTOM PERFORMANCE

## VERSA MOD OPTIONS AVAILABLE

### VERSA PERFORMANCE MOD SYSTEM

Factory installed on the 2022 ENVISION and the 2021 ENKORE, the Performance Versa Mod is for archers that want a little higher performance from their Elite bow and enjoy a bow with a slightly more aggressive draw. This mod holds peak weight longer into the draw cycle. The Performance Versa Mod has slightly less valley but lets you off the hook and keeps your aim rock solid at draw.

### STANDARD VERSA MOD SYSTEM

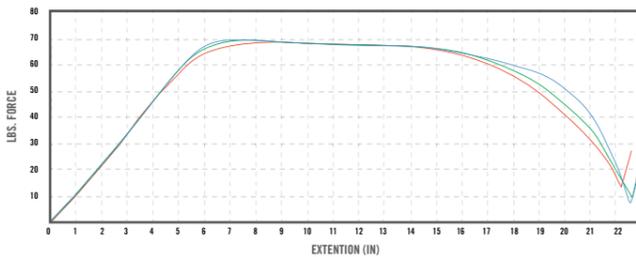

Installed from the factory on the REMEDY, KURE, REZULT, and REZULT 36. The Standard Versa Mod delivers Elite Shootability without compromise. The Standard Versa Mod gets you to peak weight later in the draw cycle and lets you off the hook sooner. If you're looking for the draw cycle that made Elite famous, the Standard Versa Mod is the only choice.

### 75% VERSA MOD SYSTEM

Available only as an add-on to your Elite bow with ASYM Tri-Track Cams. The 75% Versa Mod was designed with competitive shooters in mind. This mod is specifically designed to deliver more holding weight for archers that want to be able to customize their shot process and draw cycle. Elite Shootability is baked into this mod as well but keeps a bit more weight at the end of the draw cycle.

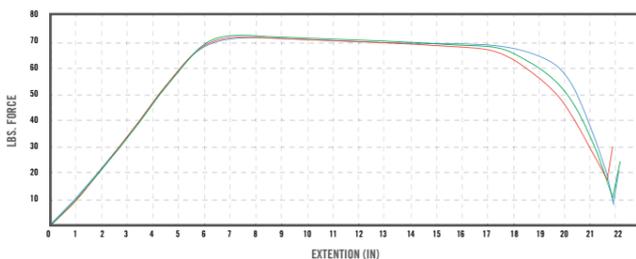

\*Mods Come with Cable Stops Installed (Not Limb Stops). Mods Do Not Change the Peak Draw Length.
