years

INTEGRITY • EXCELLENCE • INNOVATION

AAE Products are Proudly Made in the U.S.A.

Millie & Tom Fisher

In 1971, Tom and Millie Fisher, along with Charlie and Liz Sandlin, bought Plastifletch from Max Hamilton and his wife, Jewel. Plastifletch vane technology and manufacturing evolved as time went on. Back in 1948, Max cut the first vanes with scissors and templates, then progressed to a cellulose extruded material and a punch press.

Max & Jewel Hamilton

Charlie Sandlin

Max Hamilton

1971

AAE started injection molding vanes in 1974 due to a lack of quality extrusion equipment while at the same time introducing the Plastinock. Since then, AAE has led the industry in the manufacturing of nocks and vanes, and continues to be the largest manufacturer of vanes and nocks in the world. AAE relocated to our current location in Prescott Valley, Arizona in 1977.

ating D ears

2021

At the turn of the century Tom and Millie elected to retire and sell the company to their two sons, T.J. and Dan Fisher, as they were both instrumental in AAE's past accomplishments and growth. In 2006, AAE took the opportunity to purchase Cavalier Equipment from Dick and Diane Tone, which added a blooming line of quality products to AAE's growing brand. 2013 brought more change as Dan Fisher retired from AAE to pursue other interests outside of the family business. The past decade has seen Nick Fisher, who was raised and trained in the family business, become GM. With the evolving, strong support team, Nick expects the 50 year legacy of the Fisher Family and Arizona Archery Enterprises to continue it's success for decades to come.

Tom Fisher Sr. with two of the forward-handeled bow's he designed. His first design was built in 1958.

AAE's Management Team

Thank you for your interest in AAE! We have recently seen a large increase in archery participation which has been very exciting. Archery is a great sport for all generations and we continue to experience spikes amongst ladies and youth archers.

I am very proud of AAE and our dedicated team of great people that we consider family. They are the driving force in AAE's growth as our employees are all passionate about archery and what we do. From engineering to production to customer service - we strive to be the best. We take our leadership seriously in the ever growing and changing archery industry.

Working with our partners, OEM customers, top level hunters and professional archer's every year aids in helping AAE design and produce top quality, original products right here in our Arizona based facility.

These combined skills, along with the consistent increase in precision of today's archers, produces amazing results. This allows AAE to continue to evolve and develop new designs every year. Our team is incessantly looking for innovative ideas for new products and making changes to our existing products that will improve the archery experience. It may only be adding an engraving mark on one of our rests or slightly changing material in one of our vane lines to improve the toughness, but we never stand still.

Good luck and good shooting!

T.J. Fisher, President and CEO

AAE MAX[®] VANES

MAX STEALTH

AAE's MAX Stealth vane offers the whisper quiet shape of our Elite Plastifletch 26 vane. This extremely quiet and accurate vane will be appreciated by every archer.

AAE MAX Vanes are made with our unique proprietary "Elastimax" material that is extremely tough, yet flexible. This allows a high degree of helical, or fletching wrap around the smallest-diameter shafts.

The first vertical section of the vane is thicker for added vane stiffness and durability. The vanes also offer an exceptional adhesion (when used with our MAXweld Primer Pen and MAX Bond glue) and a unique "ribbed" design that channels the air vortex, making the vane control the arrow more efficiently while increasing stability and accuracy.

All MAX vanes are available in ten colors: Black, Blue, Bright Green, Fire Orange, Hot Pink, Purple, Red, Sunset Gold, White, and Yellow. Packaged in display packs of 40 and 100, or boxed in 500 bulk.

MAX HUNTER

AAE's Superior High Profile Vane

The MAX Hunter Vanes are unlike any other high-profile, 2-inch vane on the market. This is the perfect high profile hunting vane for fixed broadheads.

CRUSH
WITH LEE & TIFFANY

AAE PRO MAX

AAE's Pro MAX was designed to be the ideal size for 3D and mechanical broadheads. We used the superior design of our Max Hunter vane, scaled down for improved bow clearance.

Plastifletch MAX

PM-23

Plastifletch MAX has a perfect width base for great adhesion and proper shaft fit. It's designed with a thinner (.018") section to keep it light and flexible. The Plastifletch MAX 2.0 shield-shaped vane adds another size for archers who want a 2-inch low profile vane.

Available in two sizes: PM-2.0 Shield and PM-23.

AAE HYBRID VANES

BASE DYNAMICS

AAE introduces the New Hybrid line of vanes featuring AAE's revolutionary **Base Dynamics** technology.

Every vane company on the planet assumes the vane base only functions to bond the vane to the arrow. Well, at AAE our research team decided to look deeper into the base/vane relationship and how the base could play a role in the dynamic performance of the vane once installed.

After years of testing we discovered that there is indeed a directly proportional effect on a vane's dynamic performance in flight and how the base and vane is designed resulting in **Base Dynamics**.

All Hybrid vanes are manufactured using our industry leading Plastifletch "Lick & Stick" material with factory applied activator. It features the new **Base Dynamics** design in addition to AAE's legendary stabilization ridges for the ultimate in ease of fletching, durability, and performance.

The New Hybrid line of vanes comes in 16, 1.85 Shield, 2.0 Shield, 23, 26, 40, HP, and XB sizes. All Hybrid vanes are available in ten colors: Black, Blue, Bright Green, Fire Orange, Hot Pink, Purple, Red, Sunset Gold, White, and Yellow. Packaged in display packs of 100 or boxed in 500 bulk.

For the archer who prefers a parabolic vane in a compact size.

A favorite size in Europe for FITA/FITA Field this vane is a true wind beater.

Utilizes AAE's original 2.0 Shield, the most winning shape in target archery.

At home on any target or 3D course as well as steering your favorite mechanical broadhead. Exceptionally quiet flight.

The great all-around size that follows in the footsteps of the Max Stealth.

A great Indoor option with exceptional steering for large fixed blade broadheads.

Combines the popular High Profile 2-inch vane with the Hybrid stability and ease of fletching.

HYBRID 16

HYBRID 1.85

HYBRID 2.0

HYBRID 23

HYBRID 26

HYBRID 40

HYBRID HP

HYBRID XB

AAE teamed up with **Gregg Ritz**, the Industry's leading crossbow guru to develop the ultimate crossbow vane. Using the same profile as the Max Stealth, the Hybrid XB is designed to handle speeds in excess of 430 FPS while maintaining pure flight characteristics and ultimate accuracy.

AAE VANE COLORS

All AAE Vanes come in 10 different bright colors. This is our color reference chart.

TRAD VANES

TRAD-26

TRAD-40

TRAD-50

AAE teamed up with accomplished outdoorsman and traditional archer Aron Snyder to create the first ever Traditional archery vane. The Trad can be shot off the shelf, while maintaining the same flight characteristics and impact point as feathers. The new AAE TRAD vane provides Traditional archers the confidence to take that important shot in wet or inclement weather while having the security of knowing their fletching's will be unaffected, resulting in longer and more successful hunts in the field. The TRAD vane is made from AAE's Elite material for quick and easy fletching at home or in the field with no vane prep needed as the TRAD vane comes with a factory applied activator. They are available in three sizes: 26, 40, 50, and ten colors: Black, Blue, Bright Green, Fire Orange, Hot Pink, Purple, Red, Sunset Gold, White, and Yellow. 50 packs

AAE WAV

World Archery Vane

AAE's WAV vane is the toughest and most accurate vane for the world class recurve archer. It is designed to be used with any fletching jig, and will stay on your arrow shaft shot after shot. Low profile for riser clearance, ultra thin (.010/.3mm) and very durable. The WAV vane

has performed flawlessly in local tournaments and world championships.

Available in ten colors: Black, Blue, Bright Green, Fire Orange, Hot Pink, Purple, Red, Sunset Gold, White and Yellow. Packaged in display packs of 50 and boxes of 500 bulk.

ELITE PLASTIFLETCH

Elite Plastifletch is made from a special custom blend of materials that gives it great memory, durability, and instant adhesion. The concave base has an applied activator to improve adhesion and speed arrow assembly. Tough material, vane to vane consistency, and bright colors has made Elite Plastifletch the most widely used vane in the world. Available in four sizes: EP-16, EP-23, EP-26, and EP-40. Ten colors: Black, Blue, Bright Green, Fire Orange, Hot Pink, Purple, Red, Sunset Gold, White, and Yellow. Packaged in bags of 100 and boxes of 500 bulk. Also packaged in bags of 50 with a 3-gram tube of Fastset Gel.

EP-16

EP-23

EP-26

EP-40

AAE is very proud to be associated with technical expert John Dudley from Nock-On TV. Now you can get the same vanes that John has proven the most accurate on the market for his tournament archery and hunting.

Available in: Plastifletch Max 2.0 Shield, Plastifletch Max 23, Pro Max, Max Hunter, and Max Stealth. Printed with the "Nock-On" signature logo in Bright Green, Fire Orange, Hot Pink, White and Yellow.

Packaged in 40 pks.

Plastifletch Max 2.0

Plastifletch Max 23

Pro Max

Max Hunter

Max Stealth

MAXWeld PRIMER PEN

The MAXWeld Primer Pen preps the base of our Max Vanes. We recommend using the MAXWeld Primer Pen applicator for maximum adhesion on all MAX vanes. (Not for use on Elite Plastifletch, Hybrid, or WAV vanes.)

MAX BOND

Max Bond is specifically formulated for our Max vanes. Max vanes include our Plastifletch Max, Max Hunter, Pro Max and Max Stealth vanes. Max Bond glue also works well with Elite Plastifletch, Hybrid, and most other plastic vanes. Max Bond is a high-viscosity liquid that is easy to work with and penetrates well when using our tough Elastimax material. Whether you are fletching carbon or aluminum, this is the toughest glue available. Packaged in a .7-oz. (20-gram) bottle.

MAX CLEAN WIPES

AAE's **Max Clean Arrow Wipes** are a quick and easy method of cleaning arrow shafts for proper fletching adhesion. No more spilling liquids or smelly chemicals in your house or shop when prepping arrows for new shaft or re-fletching projects! Max Clean Arrow Wipes can be used on all forms of carbon, aluminum, and crested arrows. 10 wipes per pack.

MAX ADHESION KIT

The **Max Adhesion Kit** has everything you need for fletching MAX vanes: one 20-gram bottle of Max Bond Glue, one MAXWeld Primer Pen, and one package of Max Clean Wipes.

CRUSH
WITH LEE & TIFFANY

AAE MAX WRAPZ

Introducing the new **AAE MAX WRAPZ!** As the industry's leading vane manufacturer, it was time to offer AAE customers an extremely high-quality Arrow Wrap to complement their arrow build. Making arrows more visible in flight, easier to recover and they look amazing! The Max Wrapz are made from the highest quality non-coated vinyl and adhesives for ease of installation and long-lasting adhesion to the shaft. Max Wrapz are 1" x 5.875" and designed to fit arrow shafts up to the most standard hunting size of 6mm (.246).

Available in Flo Yellow, Flo Orange, Flo Green or Flo Pink and come 12 to a pack.

FASTSET GEL

Fastset Gel is a cyanoacrylate adhesive specially formulated for gluing AAE nocks, Elite Plastifletch, Hybrid, and WAV vanes to both aluminum and carbon shafts.

Its higher viscosity makes application easier and bonds Elite Plastifletch, Hybrid, and WAV vanes to the shaft instantly, creating a strong, permanent bond that must be cut to be removed.

Available packaged in a 3-gram tube, a 9-gram tube, or a bulk box of 25.

MAX CLEAN

Max Clean Arrow Cleaner is a concentrated, Eco-friendly powder that dissolves in water. It removes oils, and changes the pH of the surface of the shaft to promote adhesion. Each cap full will clean about 200 arrows. Works on all types of arrow shafts. Included is enough powder to clean 500 shafts. Available in standard 3-oz size or 8-oz. bulk that mixes in a 1-gallon container.

MAX IMPACT

Max Impact is AAE's superior insert adhesive designed for high impact applications. Max Impact is blended with rubber to increase its ability to withstand and absorb sudden high loads. Works great on inserts.

Packaged in a .7-oz (20-gram) or 2.0-oz (59-gram) bottle.

EPOXY

AAE Epoxy is a two-part, 24-hour epoxy for gluing nocks and point inserts into aluminum and carbon arrow shafts. It is also an excellent all-purpose epoxy that retains a very flexible bond. The syringe is designed to dispense equal amounts of resin and hardener to maximize strength. Designed to be used with AAE carbon point inserts,nock inserts, and all aluminum inserts.

NEW!

PROPHECY

**KEEP
HAMMERING**

As a lifelong bowhunter and an extremely dedicated practitioner of shooting year-round, Cam understands better than anyone the importance of a dependable, tunable and repeatable fall away arrow rest.

The Cameron Hanes branded "PROPHECY" rest is a full-capture, fall-away rest designed for any archer that demands the maximum in accuracy, consistency, and dependability who want to "Keep Hammering!"

Built on AAE's renowned Pro-Series frame, the Cameron Hanes Prophecy provides both vertical and horizontal micro-adjustment for ease of set-up and fine tuning while utilizing the most durable and repeatable dove tail system in the industry.

The proprietary trigger mechanism in the Prophecy includes an integrated nano-second delay allowing the rest to stay up longer while maintaining maximum clearance. The flexible yet unbreakable launcher adds forgiveness and minimal arrow noise. The stainless-steel tolerance-fit axle rotates on twin stainless-steel sealed ball bearings for ultimate strength and consistency. It also features a field replaceable activation cord for ease of set-up and timing whether in the shop or in the field.

The Prophecy's internal mechanism does not cycle when letting down, reducing potential unwanted noise in addition to the highest cycle count resulting in the longest lasting mechanism in its class. A slight rotation forward on the knob will activate the rest into the down position when done shooting or when storing bow.

Available in: Black & RH or LH

← KEEP HAMMERING → STABILIZERS

As a high-country hunter, Cameron is mindful of weight going in as he's always prepared to be coming out heavy, but he is never willing to sacrifice accuracy or his ability to make the shot when it counts. So, when it came to what Stabilizer Cam wanted to use the **NEW AAE Mountain Series** line fit the bill from top to bottom.

The New "Keep Hammering" Stabilizer is the ultimate in an UltraLight micro diameter stabilizer that reduces the effects of wind while maintaining stiffness and the truest definition of a stabilizer. Featuring a revolutionary internal vibration dampening material, the Mountain Series "Keep Hammering" Stabilizers are designed as the preeminent hunting stabilizer.

Available in: 10"-2.25 oz., 12"-2.75 oz., and 15"-3.1 oz.

HYBRID-26 VANES

As one of the most accomplished outdoorsmen, writers and Bowhunters in the industry, Cameron Hanes demands the same excellence from his equipment as he does from himself. As a result, and after 1000's of shots testing vanes Cam chose the amazingly

accurate, durable and easy to fletch Hybrid 26. All of the AAE Hybrid vanes are manufactured in the USA using the industry leading Plastifletch "Lick & Stick" material with factory applied activator.

Hybrid vanes features the new Base Dynamics design

to maximize the vane materials dynamic stiffness once applied to the arrow as a result of the base to vane design in addition to AAE's legendary stabilization ridges for the utmost ease of fletching, durability, and performance.

Available in 40 packs of Bright Green, Hot Pink, Sunset Gold, White, and Yellow.

ARROW WRAPS

Introducing the new **Cameron Hanes "Keep Hammering" Arrow Wraps!**

An extremely high-quality Arrow Wrap to complement your arrow build. Making arrows more visible in flight, easier to recover while also supporting Cam's "Keep hammering" movement! The Wraps are made from the highest quality non-coated vinyl and adhesives for ease of installation and long-lasting adhesion to the shaft. The Keep Hammering Arrow Wraps are 1" x 5.875" and designed to fit arrow shafts up to the most standard hunting size of 6mm (.246).

Colors currently available are Flo Yellow, Flo Orange, Flo Green and Flo Pink and come 12 to a pack.

The Pro Drop, the most accurate and stable limb-driven fall-away rest on the market, is now the most versatile as well. The Pro Drop can quickly and easily be converted from a limb-activated fall-away rest to a fixed blade rest in a matter of minutes. The Pro Drop's stainless steel axle rotates on twin stainless steel sealed ball bearings for the maximum accuracy, dependability, and longevity. The Launcher Arm stays up longer, increasing the time the arrow is on the rest which leads to more accuracy. The Pro Drop also features a shortened "Drop Time" allowing for maximum clearance.

The Whale Tail Launcher is a urethane over-molded spring steel launcher. The activation cord is coated stainless steel to minimize stretching. AAE's Limb Sandwich allows for upper or lower limb mounting. The Pro Drop is micro-adjustable both horizontally and vertically, making it easy to set-up and tune. Included is our Launch Pad to deaden any arrow or rest noise.

Available in: Standard, Hoyt Tec, Extended, or Carbon Mounts. RH/LH

**Limb or Cable
Activated
Fall-Away
Rest**

PRO DROP

AAE's Prophecy rest is a full-capture, fall-away rest designed for hunters and target shooters that expect the best in accuracy, consistency, and dependability.

Built on AAE's renowned Pro-Series frame, the Prophecy provides both vertical and horizontal micro-adjustment for ease of set-up and fine tuning.

Our proprietary trigger mechanism includes an integrated nano-second delay allowing the rest to stay up longer while maintaining maximum clearance and minimal arrow noise. The stainless steel tolerance-fit axle rotates on twin stainless steel sealed ball bearings for ultimate strength and consistency. It also features a field replaceable activation cord for ease of set-up and timing.

The Prophecy's internal mechanism does not cycle when letting down, reducing potential unwanted noise, and it has the longest lasting mechanism in its class.

Available in: Black or Red, RH/LH. Standard Mount.

PROPHECY

Hawk Eye

Full-Capture • Limb-Driven Fall-Away Rest

The Hawk Eye is a full-capture, limb-driven fall-away rest. It features our flexible DOA launcher arm for increased accuracy. It has a dual bushing system with a precision ground axle and sliding launcher system for simple tuning. Included is AAE's limb sandwich and Launch Pad for easy set-up and quiet shooting. The adjustable cage provides full arrow containment. A great rest at a great price.

Available in: RH/LH.

DRIVEN

CABLE or LIMB DRIVEN

NEW!

The Driven CD & LD Fall-Away arrow rests were designed to give bowhunters and target archers on a budget the tune-ability, vane clearance and accuracy they demand in today's market. Built on the renowned Pro Series frame, vertical and horizontal adjustments with laser etched reference marks make tuning quick and easy with the confidence of knowing you can set it and forget it.

Available in: RH/LH

lil' freakshow Full-Capture Rest

The Lil' Freakshow was created to offer the advantages of a full-capture rest with the accuracy of a launcher blade target rest at a price point every parent can afford. The crew at AAE knew that Jesse Broadwater wouldn't settle for anything less than what he knew would help every young aspiring archer achieve their goals.

Jesse has been setting the standard by which all other archers are measured, beginning when he shot a perfect 560 Hunter round at the Outdoor Nationals as a youth.

The Lil' Freakshow is the perfect target rest to get your child headed in the right direction. Featuring a dual bushing system and a precision ground axle, the Lil' Freakshow now includes the Pro-Series blade holder to allow the beginner the ability to use AAE's Pro-Series blades with the hex alignment system.

The adjustable cage provides full arrow containment for safety.

Available in: RH/LH.

STINGER

The Stinger Arrow Rest is designed to be an economical, precision arrow rest. It features a dual bushing system with precision ground axles and sliding prong system for both accuracy and ease of adjustment.

Available in: RH/LH.

PRO SERIES BLADE HOLDER

Pro Series Blade Holder allows the archer to use any of AAE's Pro Series launcher blades that have the alignment hex. It fits on any rest with a 3/16-inch shaft. Blade not included.

The Whale Tail Topper supports the Whale Tail during the shot cycle for extended launcher life.

AAE's **Pro Series Whale Tail Launcher** now utilizes the Pro Series Hex for quick and accurate launcher replacement.

The Pro Cage Offset Block is for bows that have a deeper riser cutout or thicker risers and need the Pro Series Cage to sit farther out from the rest.

The Pro Series Full Cage is a full containment cage that fits on the Pro Drop/Pro Blade and Freakshow for complete arrow security.

The Pro Series Half Cage fits on the Pro Drop/Pro Blade and provides containment from bounce offs during the draw cycle and from high wind conditions.

PRO SERIES PARTS

The Pro Series Low Clearance Cage fits on the Prophecy & Driven arrow rests for bows that have low cable rod placement on the riser.

UNIVERSAL Limb Sandwich is easy to install. The unique set screw design allows for easy timing of all limb driven rests.

ROUND Limb Sandwich is easy to install. It has a unique set screw design allowing for easy timing adjustment of all limb driven rests.

The SMALL and LARGE Limb Sandwich's are for the Pro Drop or other AAE limb-activated fall away rests. It provides maximum clearance between the modern larger diameter cams and factory installed limb dampeners.

- **The Small Limb Sandwich** fits limbs 3/4-inch and under.
- **The LARGE Limb Sandwich** fits limbs 1-inch and under.

Small Limb Sandwich

Large Limb Sandwich

LAUNCH PAD

The Launch Pad deadens the launcher impact of all fall-away rests, provides security, and helps locate your arrow before the draw.

eZ CLAMP

The eZ Clamp installs quickly and securely to your up or down cable with two Plastite screws to ensure a firm and safe grip on the cable. A unique set screw provides easy timing adjustment.

freakshow QD[®]

NEW!

The Ultimate in Precision Arrow Rests with Quick Detach system

Featuring Jesse Broadwater's Mount Design

The **Freakshow** is the toughest, most accurate micro-adjustable target rest on the market today. So what could the development team at AAE have done to improve on it? Simple, make it detachable with one hole repeatability while maintaining the unique torque tuning features archers have come to expect. **The NEW Patent Pending Freakshow QD** is just that! In addition to the standard or long mount the new rest features an industry first Patent Pending adjustable launcher arm called the "Sling Blade". The Sling Blade features AAE's proprietary hex alignment connection for ease of blade replacement without losing your tune but now it is adjustable forward or back without having to move the entire rest. The new Sling Blade will allow archers to torque tune quickly with both forward and rear adjustability dependent on the archers set-up. The Sling Blade comes with an engineered 38° angle when set in line with the rest itself while also keeping the overall blade angle adjustment of the original. The QD mount also comes with an incorporated bubble for archers using single berger hole risers which allows them to set the mount/rest perfectly straight.

Standard Mount
Slot length: 1.645"

Extended Mount
Slot length: 2.693"

sling blade[®]

NEW!

The **NEW SLING BLADE** launcher arm incorporates AAE's proprietary hex alignment launcher blade system which allows the archer to change the blade without having to re-adjust their tune. The Sling Blade arm can be purchased separately to fit onto any previous Freakshow or Pro Blade models. Available in RH or LH.

Featuring Jesse Broadwater's Mount Design

The **Freakshow** is the original arrow rest in this line of arrow rests. It utilizes Jesse "The Freak Show" Broadwater's unique torque tuning methodology and it comes in either an extended or standard mount. AAE's proprietary hex alignment launcher blade system is also featured allowing the archer to change out the blade without having to readjust their tune. The launcher arm rotates for the exact blade angle preferred. Laser-etched adjustment lines and overized lock-down machine screws ensure adjustments are visible and rest is secure. The Freakshow comes with two different original length launcher blades to help the elite target archer adjust for the perfect tune: standard width in .010" thickness (installed) and wide width in .012" thickness. Freakshow components are Stainless Steel.

Standard or Extended Mount

The Freakshow is available in two models: the Standard Mount (1.645") or the Extended Mount (2.693"), which allows the rest to be set in the optimum position for torque tuning.

Launcher Styles

There are several launcher styles to help the elite target archer adjust for the perfect tune. All launcher blades are available separately.

The **Freak Launcher Blade** was specifically designed through a collaboration of AAE's engineering team and Jesse Broadwater. This blade is specifically designed for the skinniest of FITA arrow used for outdoor shooting.

PRO BLADE Compound Target Rest

The **Pro Blade Target Arrow Rest** has been designed with the help of some of the top tournament compound shooters in the world. This rest has been built to meet their exacting standards for accuracy, durability, and ease of adjustment. Each Pro Blade has been CNC machined to very high tolerances. We believe our Pro Series frame is the finest platform for a target rest ever produced.

Launcher blades included with the Pro Blade are the most common sizes and thicknesses used: Original length, standard width in .010" thickness (installed) and wide width in .012" thickness. Pro Blade components are Stainless Steel.

Available in: RH/LH. Standard Mount: Red, Black, Blue, Pink, Green, Silver. Hoyt Tec Mount: Black only.

freakshow

Standard Mount
Slot length: 1.645"

Extended Mount
Slot length: 2.693"

PRO BLADE

HEX LAUNCHER BLADES

AAE's proprietary hex alignment launcher blade system allows the archer to change the blade without having to re-adjust their tune.

The **Freak Blade** utilizes AAE's proprietary hex cut-out for precise launcher blade replacement. This blade is specifically designed for the skinniest of FITA arrows used for outdoor shooting. The arm length, width and depth of the fork cut were tested and evaluated by Jesse and our team resulting in the most accurate launcher blade in the industry.

The **Standard Blade** is the most versatile of all the launcher blades. The width allows for a wide range of arrow sizes while maintaining the fork length and depth of cut this blade has become famous for. This blade also utilizes AAE's proprietary hex cut out for precise launcher blade replacement.

The **Wide Blade** was created for use with large diameter indoor and 3D arrows. The wide blade maintains the proportional fork and depth of cut length while scaling up to support the largest of arrows. This blade also utilizes AAE's proprietary hex cut out for launcher blade replacement.

gripper - SINGLE Mt.

w/Quick
Disconnect

The Gripper by AAE has been redesigned and improves on the original Gripper. Gripper's proprietary tapered engagement offers maximum surface area contact for the ultimate in security while using 7075 aluminum to provide the most rigid connection to the bow possible. AAE's new proprietary BLS (Bolt Lock System) automatically micro-drives the Gripper apart when the user loosens the bolt. The BLS prevents the unwanted seizing or binding common with anodizing, allowing the user to quickly and easily make minor adjustments. Laser etched reference marks have been added to both axes to monitor the finest of movements.

Available in: Single Mount or Single Mount with Quick Disconnect.

#Getagrip

gripper - DOUBLE V-BAR Mt.

w/Quick
Disconnect

The Gripper V-Bar Mount by AAE offers unmatched adjustment and stability for archers shooting a V-Bar. Featuring 7075 aluminum, the wider body portion offers additional clearance while the tapered engagement provides maximum surface area contact for excellent rigidity.

Available in: Double V-Bar or Double V-Bar with Quick Disconnect.

#Getagrip

gripper - QUIVER Mt.

w/Quick
Disconnect

The Gripper Quiver Mount by AAE provides an option for archers wanting to mount a back bar off the side of their bow using an accessory or quiver mount hole. Featuring 7075 aluminum, the Quiver Mount includes a bolt and washers to aid in mounting.

Available in: Quiver Mount or Quiver Mount with Quick Disconnect.

#Getagrip

grip

gripper - QUICK 10°

The **Gripper Quick 10°** is a 10-degree, Quick Disconnect that is the most stable QD on the market today. Made from 7075 aluminum for the ultimate in rigidity, the Gripper Quick 10° was also designed for perfect on-center alignment with any stabilizer on the market.

#Getagrip

STABLE LOCK QUICK DETACH

The **Stable Lock** is 0°/straight quick detach system for your stabilizer. It's very easy to use. Just one quick twist and it's off. Made of anodized 7075 aluminum.

gripper - SLING

The **Gripper Sling** - Many of today's bows, including carbon bows, do not provide enough accessory mounting points to utilize all of the high-end accessories an archer may want. AAE's engineers combined the safety of AAE's HR Sling with the world renowned Gripper back bar brackets allowing the archer to have both of these products together in one unit on their bow.

Available in: Single Mount with Quick Disconnect or Double V-Bar with Quick Disconnect.

Sling colors: Brown Camo, Orange, Black, Bright Green, Blue, Pink, and Red.

#Getagrip

HOT RODZ SLINGS

The **Gripper Slings** and **Hot Rodz Slings** are super durable and very easy to adjust.

Available in seven colors: Brown Camo, Orange, Black, Green, Blue, Pink, and Red.

per
by
AAE
ARCHERY
ENTERTAINMENT INC.

ADVANTE-X

The Advante-X is a micro-diameter stabilizer designed to offer archers the advantage of a micro diameter .500 (1/2") bar for additional wind reduction while weighing only 3.2 oz at 30-inches long including end caps. The Advante-X is made from high-modulus carbon for maximum stiffness. Archers looking to shoot more accurately in the wind while retaining the aiming characteristics and adjustability top archers have come to expect depend on the Advante-X.

For the archer looking to customize stabilizer logo color combinations to their other bow accessories, AAE includes five different laminated decals: Blue, Green, Pink, Red, and Tan. Front Bars include: 3 ounces of weight. Back Bars have no weights included. The Advante-X uses HR stabilizer weights. Front Bar lengths: 27", 30", and 33". Back Bar/Side Bar lengths: 10", 12", and 15".

NITROUS

The Nitrous is for the archer that wants the highest quality tournament bar. It is constructed from a custom blend of ultra stiff high-modulus carbon, making it the stiffest bar available.

AAE's Nitrous stabilizers offer benefits and features unlike any other stabilizer on the market. The bars have a small .700" O.D. that is as stiff as the top tournament bars available from AAE and have internal dampening for a smooth shot.

The Nitrous features AAE's Hidden Weight System (HWS). Each Front Bar comes with a 1-ounce cap and a built-in 2-ounce internal weight located at the weight end.

The standard 1-ounce black cap can hold two additional hidden brass weights, for a total of 5-ounces. The optional 4-ounce stainless steel cap increases the front weight capacity to 9-ounces without changing the O.D. of the bar. This greatly reduces the wind profile of the stabilizer. Optional end caps available to allow up to 22 ounces of total weight.

Back Bars/Side Bars feature a larger diameter weight system

incorporating a 6-ounce tapered weight that increases the leverage factor of the weights and maintains a smooth wind profile. Weights are sold separately.

Nitrous Specifications

Front Bar lengths: 27", 30", 33", and an 18" Wind Bar. When properly balanced, the Wind Bar will not affect the arrows impact point as a result of the stabilization change from the archer's standard front bar to the Wind Bar.

- The Front Bar comes with a 2-oz insert weight and a 1-oz outer Black Cap that will hold up to two additional hidden weights.
- Other HWS components sold separately.
- Back Bar/Side Bar lengths: 10", 12", and 15".
- Back Bar/Side Bar comes with one vibration ball.
- 1-oz, 3-oz, and 6-oz tapered weights sold separately in Stainless Steel, Black, Blue, Bright Green, Hot Pink, Neon Yellow, Orange, Purple, and Red, and Flat Black.

STREET ROD

The Street Rod stabilizer was specifically designed to allow archers to maximize their stabilization potential while remaining on a budget. The Street Rod features hi-modulus carbon with the fit and finish AAE customers have come to expect. With a MAP price of \$136.99, the

Street Rod is the perfect stabilizer for youth and beginning archers.

Available in : Front Bars are 24", 27", and 30". Back Bars/Side Bars are 10" and 12".

NITROUS HIDDEN WEIGHT SYSTEM (HWS)

AAE's proprietary HWS allows the archer to maintain the desired amount of forward weight while maintaining the bar's overall wind profile. Each Nitrous Front Bar has a built-in 2-ounce internal weight located at the weight end.

HWS End Caps:

1-oz Black End Cap

holds up to two additional internal ounces for 5 ounces of total weight.

4-oz Stainless Steel End Cap

holds up to three additional internal ounces for 6-9 ounces of total weight.

The Big Rig 8-ounce Stainless Steel End Cap

holds up to four additional internal ounces for 10-14 ounces of total weight.

The Heavy Hauler 15-ounce Stainless Steel End Cap

holds up to five additional internal ounces for 17-22 ounces of total weight.

MOUNTAIN SERIES

HOE RODZ

8" (2.1-oz)

10" (2.5-oz)

12" (2.75-oz)

15" (3.1-oz)

The Mountain Series Stabilizer are designed as a hunter's stabilizer. This series of stabilizers is an ultra light, micro diameter stabilizer to reduce wind drift while maintaining stiffness. They have a revolutionary internal vibration

dampening material to kill residual frequencies before it reaches the bow. There is a 3-oz weight that comes on it.

It is available in four different lengths: 8", 10", 12", and 15".

Additional Weights are sold separately.

WESTERN HUNTER

6" (2.65-oz)

8" (2.90-oz)

Western Hunter—Whether out West chasing high country mulies, or in a stand shooting across a corn field at that white tail of a lifetime, you need a bow that is balanced. Most hunting stabilizers provide an adequate amount of front weight but do nothing to counter balance quiver and sight weight. AAE developed the Western Hunter to allow the hunter to balance the bow just like a

tournament bow. A balanced bow reduces torque and makes for a more accurate shot. The Western Hunter comes with two carbon rods, 8" and 10", 5-oz. of adjustable weights, one bracket, and two vibration-dampening balls.

Available in: Black, RH/LH.

Additional weights sold separately: 1-oz. (2 pk.), 3-oz., and 4-oz. tapered weight.

CONQUER EXTREME KIT

12" (3.03-oz)

15" (3.48-oz)

Gripper Single w/QD

Gripper Quick 10°

The Conquer Extreme Kit combines the best of all of AAE's hunting stabilizer technology providing everything the ultimate predator will need to set up a long range tack driver. The Kit includes two Conquer

stabilizers, a 12-inch and 15-inch, a Gripper Single w/QD, and a Gripper Quick 10 with 10-oz of flat black weights. The 12-inch and 15-inch Conquer stabilizers are also available separately.

CONQUER

6" (1.83-oz)

8" (2.13-oz)

FEATURING
LIMBSAVER
TECHNOLOGY

The **Conquer** line of stabilizers was created to meet the needs of archers that want a minimal size with maximum stabilization and vibration dampening. Conquer stabilizers utilize hi-modulus carbon for an extremely effective lever arm to maximize stabilization characteristics.

The New end cap incorporates **LIMBSAVER** technology to address vibration at its origin preventing unwanted feed-

back at the bow. The Conquer line comes packaged with five total ounces of weight. Additional weights can easily be added to customize the stabilization needs of every archer. Featuring a matte black finish with camo-flamed logo, the Conquer line of stabilizers is a highly effective and stylish addition to any hunting bow.

Conquer stabilizers are available in: 6-inch, 8-inch, 10-inch, 12-inch and 15 inch.

PRO STOCK

2-oz.
disc weight

4-oz.
disc weight

4.5-oz. including a 2.6-oz. threaded end cap

The Pro Stock Hunting Stabilizer is the most tunable bow-hunter freestyle type stabilizer on the market that does not change the overall length of the bar (that may result in violations of the 12" max rule during competition). The Pro Stock's unique end cap allows the weights to be screwed on the outside of the end cap rather than to the end. The Pro Stock

will accept up to 16-ounces on the end and comes equipped with two 2-oz. disc weights with 4-oz. weights being sold separately. The end cap weighs 3-oz. and comes with three spacers (25 grains each) to ensure no matter how many disc weights the archer uses, the weights are always centralized at the end of the bar for maximum effectiveness.

KSL GOLD TAB

KSL GOLD Finger Tab in brass

KSL GOLD Finger Tab in black anodized aluminum

The **KSL Gold Tab** is AAE's cutting-edge design that represents a breakthrough in ergonomics, comfort, and feedback. Every curve, part, and edge has been ergonomically designed to conform to the contours of the shooting hand while prompting correct technique and providing a secure fit. The KSL Gold Tab fits like a glove every time. The Cordovan face is oriented on the grain of the leather for consistency. The face and backing on the KSL tabs are replaceable. It features our custom elastic finger strap for more comfort. The KSL tab plate comes in either brass or anodized aluminum. The brass gives the archer added weight in the release hand for extra stability. The Palm Plate is made from a hard composite material allowing increased adjust-ability to find the precise feel every archer is looking for. The KSL Gold Tab comes with an adjustable finger spacer. Brass tabs come with brass finger spacers; anodized aluminum tabs come with anodized aluminum finger spacers. Both come with an adjustable anodized aluminum ledge.

Available in: Small, Medium, or Large, Cordovan or Super Leather, RH/LH

KSL GOLD TAB PARTS

AAE's KSL Gold Tab Finger Spacer Kit adds a soft rubber cushion with an adjustable thickness from

.370" to .600" to the KSL Gold Tab Finger Spacer.

Brass Palm Plate

- Available separately
- Fits KSL brass and aluminum tabs

The Gold Tab Ledge
Available in:
RH/LH.

GOLD AIMING APERTURE

The **Gold Aiming Aperture** has a .019"/.5mm super bright fiber optic aiming dot. The small aperture results in a more precise aiming window

down range. The thread attachment is an 8-32 thread. Orange, Blue and Green fibers are included.

GOLD STABILIZER EXTENSION

The **Gold Line Stabilizer Extension** is the culmination of two years of development from AAE's product development team and two-time Olympic Silver medalist Jake Kaminski.

The Gold Line Extension is the first extension of its kind to use AAE's proprietary two-piece articulated body design that features a Compression Spacer and Tensioning Bolt. The Compression Spacer was designed to reduce vibration and feedback while the articulated body maintains the stabilizer systems effectiveness. The Gold Line Extension's Tensioning Bolt allows the archer to fine tune the articulated body pressure on the Compression Spacer to set the desired tune and feel; resulting in tighter groups and a more consistent tune.

The Gold Line Stabilizer Extension is available in two different lengths: 3-inch or 4-inch.

GOLD MICRO PLUNGER

The **Gold Micro Plunger** has been designed for the most discriminating archers. Incorporated in the design are several features and improvements that will help you adjust your plunger to achieve the arrow flight and accuracy you need for world class performance. With the help of Olympic Silver Medalist Jake Kaminski, AAE has created a new ultra light weight carbon stem that reacts faster than any plunger ever made. Combined with our Signature Teflon™ sleeved, stainless steel barrel, accuracy gains are unparalleled. Jake and AAE have also developed a new stem tip using aerospace materials that last incredibly long while not damaging carbon or aluminum arrows.

Available in: Blue, Red, Silver and Black.

GOLD EXTENDED CLICKER

The **Gold Extended Clicker** was designed by AAE's engineers and two-time Olympic Silver Medalist Jake Kaminski.

Utilizing AAE's Gold spring steel clicker blade, the Gold Extended Clicker is the most accurate and consistent extended clicker available.

The Gold Extended Clicker mounts to and will adapt onto any sight bar on the market.

GOLD MICRO CLICKER

AAE's **Gold Micro Clicker** was the first micro-adjustable clicker made. The Micro-Clicker is designed to give all recurve archers a precision draw length adjustment. The Gold Micro Clicker allows you to make adjustments while shooting, and is fully adjustable to fit different bow and arrow lengths. Each click is .005" per click. It mounts under the sight and is slotted for easy adjustment. The Gold Micro Clicker blades are made of nickel plated spring steel.

Available in: RH/LH.

FREE FLYTE ELITE

The **Free Flyte Elite** is a CNC machined version of our popular Free Flyte arrow rest. This rest can be mounted with the conventional side plate or the riser can be drilled and tapped for ultimate stability. The dual magnet system allows for both inward and outward movement of the arrow support arm. Two positive locking vertical and horizontal adjustments allow each archer to set up

this rest to fit any bow and make quick, positive changes for each set-up and arrow diameter. This is the ultimate finger style rest for the serious target archer or hunter. The Free Flyte Elite rest must be used with a plunger, either the Master Plunger or our Gold Plunger for an unbeatable combination.

Available in: Black, RH/LH. Patent No. 5,503,136.

FREE FLYTE

The **Free Flyte** is two rests in one! Position the magnet one way and the arrow support arm becomes a flipper style rest. Reverse the magnet and the arrow support arm folds away upon release for perfect clearance. Ideal for

hunting, target, and 3-D shooting, the Free Flyte can be used for either release or finger shooters.

Available in: Black, RH/LH. Patent No. 5,503,136

FREE FLYTE MICRO

The **Free Flyte Micro** is an upgrade of our popular Free Flyte rest. We have added a very simple horizontal micro-adjustment and positive lock. This handy adjustment is especially helpful to the target shooters trying

to super tune their equipment, or the bow hunter looking for perfect broadhead flight.

Available in: Black, RH/LH. Patent No. 5,503,136.

CHAMPION II

The **Champion II** rest is designed for elite finger shooters. This rest fits on the inside of the sight window, eliminating the need for screws or bolts. The opposing magnets have a very light tension on the arrow support arm, similar to our

Free Flyte and Free Flyte Elite rests. This simple and totally adjustable rest is easy to set up and tune, yet provides the same time-tested accuracy as our other finger shooter rests.

Available in: Black, RH/LH.

SUPER FLYTE

The **Super Flyte** is a unique rest that has a versatile mounting bracket for easy installation, and adjustable hex rod for deep center cut bows, and a removable spine point/pressure plate for use without a plunger. The arrow cage has been added as a safety feature for the beginning or young finger shooters, allowing the arrow

to stay contained if it happens to fall off the arrow support arm during the draw or shot. This is the perfect rest to put on your training bows in church camps and youth clubs. In addition, this reliable rest has a replaceable support arm for quick changes in the field.

Available in: Black, RH/LH.

ST-300 & T-300

All ST-300 and T-300 rests are available in RH/LH.

Super T-300 Hunter

Brown Lexan backed with self adhesive foam tape.

Stainless steel spine point, plus Teflon™-coated replaceable support arm.

Super T-300 Target

White Lexan backed with self adhesive foam tape.

Stainless steel cover plate, plus a replaceable support arm.

T-300 Hunter

Silver metal backed with self adhesive foam tape.

Teflon™-coated replaceable support arm.

T-300 Target

Silver metal backed with self adhesive foam tape.

With a replaceable support arm.

ELITE TAB

Hair

Super Leather

Cordovan

The Elite Tab is used by most top competitors because of its versatile arrangement. Its anodized aluminum plate and completely adjustable ledge are enhanced by the unique features of replaceable faces and backing. The Elite Tab comes

with the original Elite Tab Ledge and Elite Tab Finger Spacer.

Available in: Cordovan, Super Leather, or Hair. Four Sizes: Small, Medium, Large, and Extra-Large. RH/LH

What is the difference in the Tab Face materials?

HAIR

Hair is actual hair-on cowhide. Some archers like it because it is so slick. The problem with hair is that the face wears very quickly because when the string comes off the tab, it pulls out the little hairs.

SUPER LEATHER

Super Leather is a treated cowhide. It is a little more weather resistant, uniform in thickness and easier to break in, but doesn't last quite as long as Cordovan.

CORDOVAN

Cordovan is premium leather taken from the rump of a horse. It varies in thickness and is remarkably sturdy and durable. It takes a while to break in, but will last longer than any other face.

ELITE TAB PARTS

The Elite Tab Ledge

is anodized aluminum.
Available in: RH/LH.

AAE's Elite Tab Finger Spacer

is made from a lightweight material. It comes with the two socket head cap screws needed to attach it to your tab.

AAE's Adjustable Finger Spacer Kit

will adjust in thickness from .400" to .600" with a soft cushion rubber external surface that allows you to shoot comfortably all day long. The Adjustable Finger Spacer fits AAE's Elite Tab.

AAE's Three Finger Under Student Tab was designed especially for students who want to take their archery shooting seriously. The plate is made from a lightweight material and uses our Super Leather face. This affordable tab is made for shooting light poundage bows and is made for either the right or left handed shooter.

The Three Finger Under Student Tab is available in: Small and Medium sizes. The Small Student Tabs come in Blue, Green and Pink. The Medium Student Tabs come in Orange and Yellow.

STUDENT TAB

SMALL

MEDIUM

MASTER PLUNGERS

STANDARD

LONG

MASTER LOK

AAE Master Plungers & Master Lok all have a stainless steel barrel and a smooth action Teflon™ sleeve that enhances these superb plungers. With a replaceable tip and two sizes of tapered springs contribute to the finest tune possible.

Standard Plunger is not designed for wrap around rests. It's lock ring is designed to only be finger tightened. Available in: Black, Blue, Red, and Silver.

Long Plunger is designed for deep center shot bows. It is not designed for wrap around rests. It's lock ring is designed to only be finger tightened. Available in: Black, Blue, Red, and Silver.

Master Lok Plunger is designed for wrap around rests. It has a hex nut so you can tighten it in place with a wrench. The extra long and heavy barrel makes this our most versatile plunger. Available in: Black

Master Plungers are NOT designed for wrap around rests.

MASTER PLUNGER COLORS

Available in:
Black, Blue, Red, and Silver.

CLICKERS

AAE's **Magnetic, Extended, and Adjustable Clickers** all incorporate our dual magnet system designed for the target or IBO shooters using light weight carbon or

aluminum arrows. Very light side pressure against the arrow, plus a positive sound and feel, make these clickers unique.

MAGNETIC CLICKER

The **Magnetic Clicker** mounting, fits under the sight block. The clicker wire can be bent and adjusted to fit all bows. The clicker can also be reversed for compound shooters using a long overdraw.

EXTENDED CLICKER

The non-slip **Extended Clicker** design features a solid, one-piece mounting bracket, noted for its ease of adjustment and is mounted on the sight bar. It also incorporates three magnets; one in the rod holder, one in the channel, and the third at the bottom of the striker rod. Working together, they help eliminate bounce-back and vibration after the shot. It comes with five different size jam blocks so you can fit it onto any size sight bar.

ADJUSTABLE CLICKER

The **Adjustable Magnetic Clicker** fits under the sight mounting block and is easily adjustable for arrow length or clicker positioning. The lower positioning of the clicker rod reduces visual interference with the sight at longer distances. Available in: RH or LH.

ARIZONA

The AAE Arm Guard was created for the elite target shooter. It is a very thin, very tough Arm Guard that is contoured to fit snug and secure. This Arm Guard gives maximum protection and maximum string clearance and is vented for hot days on the shooting line.

Available in: Black, Blue, Hot Pink, Orange, Red, White and Yellow to coordinate with your equipment or clothing. New Elastic Kit sold separately.

ARM GUARD

SUPER SLING

The Super Sling is a durable finger sling made with soft nylon and flexible vinyl components for an accurate fit. Available in five colors: Black, Blue, Red, White, Yellow and two lengths: Short (5-inch) and Long (6-inch).

LUBE TUBE

AAE's Lube Tube makes pulling arrows out of any target easier than ever. Just push the arrow point through the cap to lube. The no-odor lube will not effect arrow flight. The container is re-usable with refill lube available separately.

Proudly

Made in USA

The Hole-In-One is an adjustable mount that allows the archer to have their AAE Lube Tube attached to the bow. This unique design places the Lube Tube in the most convenient place for quick access. Now you can lube your arrows with minimal effort every time. The Hole-In-One comes with a 5/16-24 low socket head cap screws and a 1/4-20 button head cap screw to allow for multiple mounting options.

Lube Tube not included.

HOLE-IN-ONE

MAG-CLIP

The **Mag-Clip** is a handy, two section key chain system held together with very strong magnets. This accessory is useful for keeping archery

accessories attached to you or your side quiver. Works great with arrow grippers, as a key chain, or for many hunting accessories. Packaged individually in eight colors: Black, Blue, Bright Green, Orange, Pink, Red, Sand, and Yellow. Or by the bucket - 25 Mag-Clips per bucket in assorted colors. Mag-Clips can be custom printed with your company's logo. Contact AAE for more information.

GORILLA GRIP

The **Gorilla Grip** is a must have for any 3D shooter. The Gorilla Grip is made of solid natural rubber for superior grip on all types of arrows and it's the easiest and most comfortable puller on the market. Its large diameter has been designed for maximum grip strength.

Available in: Standard with a spring clip or Elite with a Mag-Clip.

PRO STRING SERVER

The **Pro String Server** features a Black or Orange carbon polymer body with a unique double-bar tension system. The self-centering washers contribute to even tension while serving. The replaceable, no-fray thread guide not only simplifies threading, but increases the smoothness of the serving process. This tool will produce the finest serving you have ever had.

SLIPPERY SLIDE CABLE GUIDE

The **Slippy Slide Cable Guide** incorporates a tough Teflon™-filled material that reduces drag and increases accuracy. Available in eight colors: Black, Gray, Green, Pink, Red, Orange, Blue, and White.

FLETCH III

Fletch III makes fletching simple. Designed for target archers and bowhunters, it is easy-to-use, accurate, portable, and affordable. Build identical arrows every time!

Fletch III features a fixed 1-degree offset and fits arrows .200" to .421" in diameter (X-10 diameter to 27 diameter).

Each component is specifically designed from materials that enhance that component's function. For example, glue won't stick to the clamp because it is made of a highly rigid material containing Teflon™ and silicone.

The X-Stand/Arrow Holder is designed for different sizes of arrow shafts. It is labeled "L" (large diameter) and "S" (small diameter) indicating which side of the stand to use. The Four Fletch and Crossbow Bolt is sold separately.

IP NOCKS

IP Nock—For decades AAE has been the world's largest nock manufacturer, producing nocks for tens of millions of arrows around the world. Through this time we have only created a few over-nocks (P-Nock and Z-Nock) under our own brand. With the continuous growth of archery we have decided to construct our own line of AAE branded internal press fit nocks. Gathering all of our knowledge and ability we are now offering the IP (Internal Plastinock) line of nocks. Designed with shortened bodies for accuracy and durability along with single click snap features for a consistent release, AAE has created a nock that is extremely durable and forgiving, while still being effective for finger and release shooters alike.

The IP Nocks are available in: Three sizes: 4 (.165"), 5 (.205"), 6 (.245"), and eight colors: Black, Blue, Bright Green, Hot Pink, Orange, Red, White and Flo Yellow.

PLASTINOCKS

AAE's Plastinocks have a double snap design that gives a positive string fit but allows the arrow to leave the bowstring smoothly. Longer ears and an angled throat design keep the nock on the bowstring at any string angle. Its thin base gives the nock a perfect blend to the arrow shaft.

The Plastinocks are available in: Four Sizes: 1/4", 9/32", 5/16", and 11/32" • Seven Colors: White, Black, Red, Blue, Flu. Orange, Flu. Ruby, and Flu. Green. Packaged in bags of 100 or bulk bags of 1,000

FIBERGLASS NOCKS

The Fiberglass Nock is designed for entry level fiberglass arrows.

Available in: One Size to fit 17/64" shaft diameter • Two Colors: Green and Orange • Packaged in bags of 100 or bulk bags of 1,000

MOON DRIVERS

Moon Driver Nocks are for crossbow bolts. Moon drivers have a half-moon shape for string engagement, and are made by high-tolerance injection molding.

Available in three sizes: 2117, 2216, and 2219 • One Color: Green • Packaged in bags of 100 or bulk bags of 1,000

ARROW STRAIGHTENER

AAE's Arrow Straightener is an extremely strong and rugged precision instrument made from hard anodized aluminum. The .0005" indicator allows a person to straighten an arrow to the tightest of factory standards.

Completely adjustable precision bearings enable the very tips of the shaft to be straightened. The Delrin straightening pad will not mar or dent the arrow. This tool will pay for itself after straightening a few dozen arrows.

AAE CAPS

All of AAE's Caps have snap adjustable backs.

AAE SHIRTS

AAE's Classic T-Shirts are available in: Short Sleeve and Long Sleeve Black, Small, Medium, Large, X-Large, 2X, and 3X.

BOOKS

Training for Archery

draws on 22 years of experience and expertise as an archer, by two-time Olympic silver medalist Jake Kaminski. In this book he shares his training plans for archers of all ages and skill levels.

The book covers topics such as, how many arrows to shoot, training schedules, strength and conditioning, foods that fuel archery, along with recovery and sustainability.

Get Sponsored Archery

is a step-by-step guide that teaches archers how to get sponsors.

Written by Heather and Jake Kaminski.

Technical Bowhunting

was written to change the way you think about shooting a bow, choosing equipment, setting up gear, making tough shots in the field, and dealing with buck fever and target panic by delivering powerful advice and anecdotes. The book includes tips to help unlock your skill and potential as an effective archer and bowhunter.

Written by expert bowhunter Joe Bell, technical archery writer, includes interviews and tips from some of the sport's greatest pros, including Chuck Adams and Randy Ulmer.
