# GT & GX

## THE RISERS THAT HAVE CHANGED

# EVERYTHING

After more than a thousand GT risers shipped from November 2019 and with production and sales constantly increasing all over the world despite the general crisis due to COVID-19, we can proudly confirm that GT risers have achieved their main goal, **which was to change the rules of the game, according to the slogan we created:**

**"GT Riser – Changing The Game"**

**And the rules of the game for risers have really changed**, almost completely freeing users from critical choices in the poundage of limbs and therefore limiting the expenses in the purchase of limbs of different power, thanks to

the incredible **30% range of adjustment** of poundage!

All this, being able to use without problems the Bare Bow accessories of all the other GILLO risers, as well as the innovative UFO V-Bar with three possible positions on the vertical of the riser.

Inserted into the innovative GT ecosystem are the incredible GTL-C88 limbs, specially designed to extract the last drop of power and speed from the GT risers.

Gillo Gold Medal offers archers the opportunity to exploit ingenuity, innovation, experience and customization.

GT RISERS ARE NOW  
AVAILABLE ALSO IN THE NEW**

**GILLO GX RISER**

**BUT WITH A MUCH LIGHTER  
STRUCTURE:  
1170g MASS WEIGHT  
TOTAL, ONLY**

## THE NEW GX RISER AND THE FULL RANGE OF GT RISERS (ILF COMPATIBLES)

# GX

Today, after almost two years and thousands of GT risers produced, we are also able to present the horizontal evolution of GT technology, with the **GX 25**, designed to meet the demands of all those who for various reasons have found the GT 25 not suitable for their needs, primarily for the weight of the riser itself, 1350 g.

**After a long design work and through several extensively tested prototypes**, the GX 25 riser is finally available, with the same possibility of adjusting 30% of the poundage of the GT 25, in

**1170 g only of weight**  
at a  
**very competitive price!**

Mainly designed for use as an **Recurve** and **Barebow** for **children, teens, women, beginners** and in any case **for all those who need a light riser** with wide power adjustment so as not to have to replace it during their archery growth, it is equipped **as standard with the new grip G03-YG-M**, already available as an accessory for all GILLO risers for over a year, "slimmer" than the usual GILLO grips of the G1 family, which in turn can still be used on the GX riser.

Available exclusively with pocket Silver color and in the new bright sandblasted finish in 6 colors for the RH version and 3 colors for the LH version.

Compatible with all existing accessories for GILLO risers, **it develops the best of its possibilities with the use of the new intermediate Carbon limbs GILLO GTL-Q3**, in turn already available in 66" / 68" / 70" and poundage range between 26 and 38 pounds, in 4-pound steps.

## 25"

# ILF COMPATIBLE

GILLO GT 25  
ILF COMPATIBLE

The introduction of the new GT system not only allows you to undertake a more thoughtful archery path, thanks to the customizable management of the bow power at incredible levels, but also allows you to customize the aesthetics of your riser over time, without necessarily having to change the riser itself.

The novelty of 2022 is precisely the variety of color of the pockets which gives the possibility, already in the initial choice, to have a **SPECIAL, TAILOR MADE** riser.

Why limit yourself to choosing from the standard colors? Why not choose to be patriotic with your country's flag? Why have a riser like everyone else?

The concept of the **riser that changes with the archer** is what allows the GILLO GT riser to be **the only possible choice for an evolving archer.**

# GT

In addition to an infinite customization between power, balance and aesthetics, there is also the possibility of

**transforming** and adapting the

pockets to the type of limb you want to use, so as not to have to change the riser.

## 25"

# FORMULA COMPATIBLE

Testing different materials on the same riser is the best way to face and evaluate any changes you want or have to manage.

# GX

## 25"

# ILF COMPATIBLE

The GX range, inspired by the GT range, arises from the **need** to allow those who have just approached our sport to avoid having to face constant changes in materials and therefore constant expenses.

The GX riser has a **limited weight**, **incredible possibilities** of range of poundage (it keeps + -15% , total 30%, like the GT riser), suitable for competitions of all levels and all with a modern and current aesthetic.

For those who start, for those who do not want or cannot lift excessive weights, for young people in the growth phase ... here is the riser created especially for them!

# GT short

## 19" - 21" - 23"

- Short risers designed for **hunting**, traditional shooting and use at moderate draw lengths
- 19 "ILF, 21" ILF, 21 "Formula and 23" Formula with alignment plates in Brass and **possibility of shooting without grip** with G05-WSP wood side plates
- 23 "ILF **ideal for target shooting with moderate draws**, available in several matte colors

# G1 . G2 . GQ

## 25"

# GT long

## 27" - 29" - 31"

- Long risers **designed for use at high draw lengths**
- G1 27", GT 27" ILF, GT 29" ILF and GT 31" ILF with an **asymmetrical structure** with 0.5 inches increased on the lower part, favor the use in **string walking for Barebow**
- GT 29" and GT 31" ILF allow the use of dedicated GILLO Bare Bow weights in **multiple vertical positions**

# CUSTOMIZATIONS

## GO3-YG

- New series of 3D printed grips suitable for all risers in the GILLO range
- Thickness of the throat decreased by 2mm from the original GILLO G1 grip
- 3D printed in various colors
- Available with 3 different profiles: LOW, MEDIUM, HIGH
- The MEDIUM profile grip has maintained the optimal angle of the first G1 standard version

## GO1-LB

- Limb bolt with back locking Stainless Steel screw
- Available in 5 different colors
- Compatible with GILLO G1, G2, GQ, Ghost

## GO3-LB

- Limb bolt for GT /GX risers
- Available in 3 different color

## GO1-YG

- 3D printed grip in various colors
- Available in the two versions RH and LH
- Available in Medium and High version

## GO2-PPK

- 3D printed decorative caps
- Available in various colors

## GO1-AP-AL

- Alignment plate
- Aluminum 7075
- 11 g

## GO1-AP-BR

- Alignment plate
- Brass
- 24 g

## GO1-RG

Wood grip Root color  
MEDIUM

## GO1-WG

Wood grip Walnut

layer LOW

## GO2-CKK

- 3D printed clicker plates
- Kit formed by the short and long version
- Available in different colors

## GO1-CKK

- Available in different aluminum anodized colors

GO3-YG

# GTL88 CARBON

## ILF ADVANCED TARGET LIMBS

- Perfect match for GILLO GT risers
- Can also be used on all ILF compatible risers
- Making 70", 68" e 66" length bow on 25" risers
- Carbon-Foam 7 Layers laminated construction
- Advanced curve for maximum speed and softness in clicker area
- Smooth aiming draw area for Barebowstring walking use
- Available in 4 pounds increments: 30#-34#-38#-42#

# GTL.Q2

## ILF TARGET CARBON - FOAM LIMBS

- Perfect match for all GILLO Gold Medal risers
- Making 70", 68" e 66" length bow on 25" risers
- Can also be used on all ILF compatible risers
- Fiberglass + Carbon + Foam, 5 Layers construction
- Increased curve for maximum speed and smoothness
- Available in 5 pounds increments: 24# - 28# - 32# - 36# - 40#

# GTL.Q3

## ILF TARGET CARBON - FOAM LIMBS

- Perfect match for all GILLO Gold Medal risers
- Making 70", 68" e 66" length bow on 25" risers
- Can also be used on all ILF compatible risers
- Fiberglass + Carbon + Foam, 5 layers construction
- Increased curve for maximum speed and smoothness
- Available in 4 pounds increments: 26# - 30# - 34# - 38#

# STABILIZERS

## GS8

- Extra stiff High Module 40 Ton Carbon tube with 3K mesh, matte finishing, for Long Rods and Extenders
- Extra stiff High Module 40 Ton and 30 Ton mixed Carbon tube with 3K-mesh, matte finishing, for Short Rods
- Designed for Recurve and Compound use as well
- 15mm external diameter for minimum drift in side winds
- 3.5mm tube wall by cross Carbon nets, for extreme stiffness
- 4.2mm flexion @30"/1kg on tip, +-5%
- Black color anodized Aluminum terminations caps, 19 mm diameter
- Black oxidized Steel termination screws, 1/4-20 UNC and 5/16-24 UNF
- Long rods available: 26" - 28" - 30" - 32"
- Short rods available: 10" - 12" - 15"
- Extenders available: 5" - 6"

## GS9

- Hi-Tech high modulus carbon tubes
- 13 mm external diameter, 3K matte surface
- 3.6 mm tube wall by cross Carbon nets, for top stiffness
- 5.0 mm flexion @30"/1kg on tip +-5%
- Black color anodized Aluminum terminations caps, 19mm diameter
- Black oxidized Steel termination screws, 1/4-20 UNC and 5/16-24 UNF
- Long rods available: 26" - 28" - 30" - 32"
- Short rods available: 10" - 12" - 15"
- Extender available: 6"

## GS6

- Extra stiff High Tech 30 Ton 3K Carbon tube with Gold color filaments inside the Carbon mesh
- 17 mm external diameter, matte surface
- 2 mm tube wall by cross carbon nets, for extreme stiffness
- 5.5 mm flexion @30"/1kg on tip, +- 5%
- Gold color anodized Aluminum terminations caps, 19mm diameter
- Black oxidized Steel termination screws, 1/4-20 UNC and 5/16-24 UNF
- Long rods available: 26" - 28" - 30" - 32"
- Short rods available: 10" - 12" - 15"
- Extenders available: 5" - 6"

## GS7

- Super stiff High Tech 3K Carbon tube
- 17 mm external diameter, matte surface
- 1.0 mm tube wall by cross carbon nets, for high stiffness
- 8.5 mm flexion @30"/1kg on tip +-10%
- Gold color anodized Aluminum terminations caps, 19mm diameter
- Black oxidized steel termination screws, 1/4-20 UNC and 5/16-24 UNF
- Long rods available: 28" - 30"
- Short rods available: 10" - 12"

RECURVE

## The "UFO" V-BAR SYSTEM GVB - K03

- Designed to fit the lower round seats in the GILLO GT, GX, GQ and G2 risers
- Allows 4 pre-set different V-Bar angles on the horizontal plane: 90 ° / 80 ° / 70 ° / 60 °, and infinite angles on the vertical plane
- Up to 2 UFO systems can be used at the same time on the GT, GX, GQ and G2 risers
- Specifically designed for the GILLO GS6, GS7, GS8 and GS9 stabilizers, it can also be used with any other stabilization on the market that does not exceed 20 mm in diameter at the base
- Total weight 140 g

## GILLO EXTENDERS GSX-EX-31/41/51

- V-Bar Extenders
- Aluminium anodized
- Available in Gold and Black anodized colors
- Available in lengths: 3", 4", 5"

### GSX-EX-2

- 2" Extender
- Full 7075 Aluminum
- Titanium Gold color plated

### GS6-WF

- Flat weight with 1/4"-20 UNC x 1/2" Stainless Steel grub screw
- 27g weight - grub screw included
- 24Kt real Gold plated

### GS6-WK4

- Kit with 4 weights for GS6, GS7, GS8 and GS9 GILLO stabilizers, also matches any other stabilizer in the market
- 4 x 27g + 3 Plastic caps
- Plastic 3D printed weights caps in different colors

# INFINITE COMBINATION

GILLO Gold Medal presents a whole range of weights imagined, designed and manufactured to give to the archer who uses GILLO risers the possibility to customize the weight distribution on their bow.

Starting from the recurve bow, with the addition of one or more combinations of disc weights (DK6 and / or DK2) and up to the bare bow, in which the customization of the lower weight distribution of the riser is essential for the performance increase itself.

**DK6**

SSTEEL  
6 x 25g

ALUMINUM  
6 x 10g

SSTEEL  
6 x 25g

**DK2**

TUNGSTEN  
2 x 55g

SSTEEL  
2 x 45g

# ACCESSORIES

**NEW**

## GPD-01-8

- USB pendrive
- Capacity 8 GB
- Containing the GILLO 2022 catalog

**NEW**
