LONG IS

GILLO Gold Medal's GT technology allows for the use of longer and more stable risers

Since there are bows that can be disassembled into three parts, the so-called Take Downs, the generic length offered for the riser has always been between 24" and 26", with the only existing variations always made to shorten the riser itself, at 23", 21", 19" or even at 17", but never to lengthen it. The limits towards longer risers were before processing technologies and then anchored to the idea that really long bows would have been inefficient if not used with draw lengths of over 31", not so rare in the world of archery. Then it became customary define the length of the bow only in relation to the draw length, with the famous table still largely used today used which establishes:

From 28" draw length up - 70" - 25" riser and long limbs

From 27" to 29" draw length - 68" - 25" riser and medium limbs

From 25" to 28" draw length - 66" - 25" riser and short limbs

From 22" to 26" draw length - 64" - 23" riser and short limbs

Too bad there are still countless combinations of draw length and body conformation that prevent in fact to stick to that table and infinite personal needs that would have always required others solutions. Robust builds and buxom women can in fact present interference between the angle of the string and the torso of the archer on longbows, as well as on the contrary fingers of considerable size can be too flattened by a bowstring that is too short. The traditional bow design, with the brace increasing as the length of the bow increased and the position of the pivot point constantly in the center of the geometry, brought the bows to an inevitable inefficiency as their length increases. In fact, therefore, the world of the Take Down bow has been limited for over thirty years at 90% on 25" risers.

"GILLO Gold Medal" already in 2014 has instead begun to reverse the trend, successfully recovering with the

#GilloCho

S BETTER

27" G1 riser the geometries already developed by the designers themselves in 2007 with the design of the then first 27" riser in the world, the Luxor 27. The key points of the G1-27 geometry then became the basis for the GT 27 and for the following GT 29 and GT 31. Basically:

A) The pivot point is $\frac{1}{2}$ " higher than the geometric center of the riser, aiding Barebow use in String Walking,
B) The degree of deflection is 35 mm for all GT risers from 23" up to 31", i.e. ALL risers work with the same angle of limbs and with the same brace, without loss of efficiency as the riser lengthens. In particular,

characteristic B allows for the first time in the history of long risers to use them even with draw lengths limited to 27" even with a GT-29, with unparalleled advantages in terms of stability and efficiency of the bow, which can be used with shorter and therefore more performing limbs. Hence, current solutions become much more numerous depending on the shooting style and the range specific conformation of the archer.

The new usage table made possible by GT technology created by GILLO Gold Medal clearly shows the numerous solutions (in Green) now available to many archers who previously had to be limited to the canons combinations (in Yellow). For both Olympic bow and Barebow, many archers can now choose more efficient combinations with the use of long risers, which generally lead to conclusion that **"Long is better"**.

Draw Length (")	Bow	Riser	Limbs
34+	76"	31"	Long(70)
33-32	74"	31"	Medium (68)
	74"	29"	Long(70)
	72"	29"	Medium (68)
	72"	27"	Long(70)
31-30	72"	29"	Medium (68)
	72"	27"	Long(70)
	70"	27"	Medium (68)
	70"	25"	Long(70)
29-27	70"	29"	Short (66)
	70"	27"	Medium (68)
	70"	25"	Long(70)
	68"	27"	Short (66)
	68"	25"	Medium (68)
	68"	23"	Long(70)
26-23	66"	25"	Short (66)
	66"	23"	Medium (68)
	64"	23"	Short (66)

Changing The Game

GT 27"-29"-31" LONG RISERS

GILLO risers declared long are designed for use at high draw length. The range of long risers includes: GT 27" ILF, GT 29" ILF and GT 31" with asymmetrical structure with 0.5 inch oversize on the bottom which can also favor the use in String Walking for Barebow.

GT 29" ILF and GT 31" ILF allow the use of weights dedicated GILLO in multiple vertical positions.

THE LONGEST RISER FORMULA

GT^{25"} ILF COMPATIBLE

The concept of riser that WETSUIT WITH THE ARCHER is what allows the GILLO riser to be the only possible choice for an ARCHER IN EVOLUTION.

The introduction of the GT system allows not only to undertake a more considered archery path, thanks to the management customizable to incredible levels of bow power, but it also allows you to customize the aesthetics of your riser over time, without necessarily having to change the riser itself. In 2021, color customization became available for pocket, already in the initial choice, which gives the possibility of owning a unique, special and CUSTOM MADE riser.

GT^{25"} ILF COMPATIBLE

CERAKOTE® SERIES

- Recurve & Barebow riser
- ILF compatible
- Floating limbs pocket allows over 30% poundage adjustment range
- Integrated shock absorbers
- 25" length, RH and LH versions
- Body and pockets machined from solid Aluminum bar
- **Cerakote® finish surface for body**
- Matte anodized finish for pockets
- Hard wood, Root color medium grip
- Approx. 1350 g total weight
- Dual color version RH: **Gold (KGO), Safety Orange (KSG), Sand (KSD), Dark Green (KDG), White (OWH)**

The GT System

GT 25" FORMULA COMPATIBLE

In addition to a customization infinite between power, balance and aesthetics, it combines the possibility to transform and adapt pockets the type of limb you want use, so as not to having to change risers.

Test different materials on the same riser is the best way to address and evaluate each change you want or you must manage.

GX^{25"} ILF COMPATIBLE

The GX range, inspired by GT range, born from the need to allow who just approached our sport of not have to face constantly material changes e so keep spending.

The GX riser has a LIMITED WEIGHT, incredible excursion possibilities of poundage (maintains +-15% such as the GT riser), suitable for competitions of all levels and the all with a modern aesthetic and current.

For beginners, for those who don't want to or cannot lift excessive weights, for young people growing up...
...here is the riser created specially for them!

GT 19"-21"-23" SHORT RISERS

- Short GILLO GT risers are designed for hunting, traditional shooting and for use with moderate draw lengths.
- 19" ILF, 21" ILF, 21" Formula and 23" Formula are made with brass alignment plates and free firing capability grip with G05-WSP side wood plates.
- 23" ILF is ideal for target shooting with moderate draws, available in multiple bright colors.

G1 25" M

GQ 25" M-L

- The GQ riser is available in M and L versions
- The M version features: molded plastic grip, plastic 3D printed clicker plate, 1 central bushing for stab in screwing silver colored steel, silver colored preload.
- The L version includes: wooden grip, plate gold aluminum clicker, 5 bushings in gold colored steel, gold colored preload.
- Again available in two-tone version.

LIMBS

GTL.88 CARBON

ILF ADVANCED TARGET LIMBS

- Perfect combination with all GILLO Gold Medal risers, in particular with the GT range
- Suitable for all commercially available ILF mount risers
- Available in 70", 68" and 66" lengths on 25" risers
- Carbon + 7-layer Multi-Layer Foam (in the picture on the left layers are specified in detail)
- Increased curvature for maximum speed and softness underneath clickers
- Design studied to make String Walking optimal
- Can be ordered in four weights: 30# - 34# - 38# - 40#

GTL.Q7

ILF ADVANCED TARGET CARBON LIMBS

- Perfect combination with all GILLO Gold Medal risers, in particular with the GT range
- Suitable for all commercially available ILF mount risers
- Available in 70", 68" and 66" lengths on 25" risers
- Carbon + 5-layer Multi-Layer Foam
- Increased curvature for maximum speed and softness underneath clickers
- Design studied to make String Walking optimal
- Can be ordered in four weights: 30# - 34# - 38# - 40#

GTL.Q2

ILF TARGET CARBON - FOAM LIMBS

- Perfect combination with all GILLO Gold Medal risers, in particular with the GT and GX range
- Suitable for all commercially available ILF mount risers
- Available in 70", 68" and 66" lengths on 25" risers
- Fiberglass + Carbon + Foam, with laminate construction
- Increased curvature for maximum speed and softness under clicker
- Design studied to make String Walking optimal
- Can be ordered in five weights: 24# - 28# - 32# - 36# - 40#

GTL.Q3

ILF TARGET CARBON - FOAM LIMBS

- Perfect combination with all GILLO Gold Medal risers, in particular with the GT and GX range
- Suitable for all commercially available ILF mount risers
- Available in 70", 68" and 66" lengths on 25" risers
- Fiberglass + Carbon + Foam, with laminate construction
- Increased curvature for maximum speed and softness under clicker
- Design studied to make String Walking optimal
- Can be ordered in five weights: 26# - 30# - 32# - 34# - 38#

GHOST X

ILF HUNTING CARBON LIMBS

- Limbs designed for hunting
- Perfect match with GQ 23" Hunter, GT 23", GT 21", GT 19", GHOST 19" riser
- Suitable for all commercially available ILF mount risers
- Present only in 68" length (on 25" riser)
- Fiberglass + Carbon + Bamboo
- Traditional curvature
- Orderable in poundages from 34# to 46#, develop from 40# to 52# on 19" riser

CUSTOMIZATIONS

G03-YG

- New 3D printed grip series suitable for everyone the risers of the GILLO range
- Thickness decreased by 2mm from the original grip GILLUS G1
- 3D printed
- Assorted colors
- Available with 3 different profiles: LOW, MEDIUM, HIGH
- MEDIUM profile grip held the angle optimal than the first standard version

The angles:
LOW: 66°
MEDIUM: 58°
HIGH: 48°

G01-RG
Colored wooden grips briar MEDIUM

G01-WG
Colored wooden grips walnut MEDIUM

GBG-YG
3D printed grip "BALL" by Frangilli

G01-RG
Colored wooden grips briar HIGH

G01-WG
Multilayer wood grip MEDIUM

G03-MG
Multilayer wood grip LOW

GBG-MW
Wooden grips "BALL" by Frangilli

G03-MG
Multilayer wood grip MEDIUM

G01-YG

- 3D printed grip
- First version of the standard grip
- Available in RH and LH versions
- Available in MEDIUM and HIGH version

G01-LB

- Preload with locking screw
- Available in 5 different colors
- Suitable for GILLO G1, G2, GQ, Ghost risers

G03-LB

- Preload for GT/GX risers
- Available in 3 different colors

G01-AP-AL

- Alignment plate
- Aluminum 7075
- 11g

G01-AP-BR

- Alignment plate
- Brass
- 24g

G02-CKK

- 3D plastic clicker plates
- Kit formed by the short and long version
- Available in various colors

G01-CKK

- Aluminum clicker plates
- Available in various colors

G02-PPK

- 3D printed decorative caps
- Available in various colors

GSX-EX-31/41/51

- Extenders for stabilizers
- Anodized aluminum
- Available in Gold and Black versions
- Available in lengths: 3", 4", 5"

GSX-EX-2

- 2" extenders for stabilizer
- Anodized aluminum
- Available in gold color

GILLO EXTENDERS

WEIGHTS AND ADAPTERS

GS6-WF

- Weights for GILLO GS6, GS7, GS8 and GS9 stabilizers, as well as for all stabilizers on the market
- 27 g - grain included
- 24K Gold Plated

GS6-WK4

- Kit of 4 weights for GILLO GS6, GS7, GS8 and GS9 stabilizers, as well as for all the stabilizers on the market
- Wheat included
- 24K Gold Plated

GSX-UA-01

- Universal adapter for stabilizers
- Composed of female 1/4"-20 to female 5/16"-24
- 1 x 1/4"-20 and 5/16"-24 set of steel screws included
- Adds 35g and 1.5" of length to stabilizer

GSX-UA-02

- Universal adapter
- Male 1/4"-20 male 5/16"-24
- With hexagon for 1/8" Allen wrench

GSX-CW

- Disc weights for stabilizers
- 4 colors available: gold, black, purple, blue
- 50 g of weight

FINAL DAMPER GILLO

GSX-FD

- Anodized aluminum in all its parts
- Adaptable to any need for softness and/or hardness thanks to the use of a special silicone ball due to its stability characteristics

V-BAR SYSTEM recurve

GVB-K01

- Flat V-bar at 2 x 45°
- Anodized aluminum (two colors available: gold and black)
- Specifically designed for GILLO GS7, GS6, GS8 and GS9 stabilizer and usable for each stabilizer on the market

GVB-K02 GVB-V22

- V-bar with 3 axis system
- Anodized aluminium, fixed with steel M8 screws and spring washers
- Available in two colors: gold and black
- Available in the version WITHOUT (GVB-V22) or in the version WITH (GVB-K02) central bolt GVB-B11

GSJ-K02 GSJ-J22

- Side-Joint with 3-axis system for Compound
- Anodized 7075 aluminum and fixed with steel M8 screws and spring washers
- Available in the version WITHOUT (GSJ-J22) or in the version WITH (GSJ-K02) central bolt

SIDE JOINT compound

STABILIZERS

- 60 Ton extra stiff carbon tube with finish matt carbon, Hi-Tech
- External diameter: 13mm, for better performance in presence of wind
- Tube thickness: 3.6mm of carbon lattice for extreme stiffness
- 5.0mm of flex @30"/1kg at tip, +-5%
- Black oxidized steel terminal screws, 1/4-20 UNC and 5/16-24 UNF
- Central long rod available in sizes: 26", 28", 30", 32"
- Side rod available in sizes: 10", 12", 15"
- Extender available in sizes: 6"

GS9

- 40 Ton extra stiff carbon tube with finish matt carbon, Hi-Tech
- External diameter: 13mm, for better performance in presence of wind
- Tube thickness: 3.6mm of carbon lattice for extreme stiffness
- 6.0mm of flex @30"/1kg at tip, +-5%
- Black oxidized steel terminal screws, 1/4-20 UNC and 5/16-24 UNF
- Central long rod available in sizes: 28", 30"
- Side rod available in sizes: 10", 12", 15"

GS13

- 40 Ton extra stiff carbon tube with finish matte carbon
- Designed for a useful use for Recurve and Compound
- External diameter: 15mm, for better performance in windy conditions
- Tube thickness: 3.5mm of carbon lattice for extreme stiffness
- 4.2mm of flex @30"/1kg at tip, +-5%
- Black oxidized steel terminal screws, 1/4-20 UNC and 5/16-24 UNF
- Central long rod available in sizes: 26", 28", 30", 32"
- Side rod available in sizes: 10", 12", 15"
- Extender available in sizes: 5", 6"

GS8

- Extra stiff 30 Ton carbon tube with golden filament inside the carbon finish
- Outer diameter: 17mm, matte surface
- Tube thickness: 2mm for greater rigidity
- 5.5mm of flex @30"/1kg at tip, +-5%
- Gold anodized aluminum end caps (19mm)
- Black oxidized steel terminal screws, 1/4-20 UNC and 5/16-24 UNF
- Central long rod available in sizes: 26", 28", 30", 32"
- Side rod available in sizes: 10", 12", 15"
- Extender available in sizes: 5", 6"

GS6

- Super stiff carbon tube
- Outer diameter: 17mm, matte surface
- Tube thickness: 1mm for high rigidity
- 8.5mm of flex @30"/1kg at tip, +-5%
- Gold anodized aluminum end caps (19mm)
- Black oxidized steel terminal screws, 1/4-20 UNC and 5/16-24 UNF
- Central long rod available in sizes: 28", 30"
- Side rod available in sizes: 10", 12"

GS7

THE "UFO" V-BAR SYSTEM

GVB-K03

- Designed for use in the slot found in GILLO GT, GQ, and G2 risers
- It has 4 different angles on the horizontal plane: 90°/80°/70°/60°
- Presents infinite angles in the vertical plane
- Up to 2 UFO systems can be used on the GT, GQ and G2 risers
- Specially created for GILLO GS6, GS7, GS8 and GS9 stabilizers
- It can also be used with any other stabilizer on the market that does not exceed 20mm in diameter at the base
- Total weight 140g

THE BLADE

The line of weights called BLADE was born from the idea of uniting the need to diversify the distribution of weight on the bare arch and the desire to "play". The creation of 3 separate parts that can compose, move, transform based on the needs and desires of the archer, he gave the idea of "going out from the blueprints". Inspired by just the blade of a sword, this weight can be placed in two different ways and is available in aluminum or steel.

Here are the best known combinations (certainly not all) of weights created by the union of one or more GILLO Gold Medal elements:

G01-BW-01-AL	270 g	G01 A-BLSS-A	870 g	G04-BW-04-AAA	350 g	G04-BW-03-AL	220 g
G01-BW-02-AAA	400 g	G01 DG-S centr	970 g	G04 A-BLAL-A	450 g	G04-BW-03-SS	630 g
G01-BW-02-ASA	590 g	G01-BW-02-SSS	1220 g	G04-BW-04-ASA	540 g		
G01-BW-02-AAS	710 g	G01 S-BLSS-S	1500 g	G04-BW-04-SAS	800 g		
G01 WF-A centr	840 g			G04-BW-04-SSS	990 g		

THE HAMMERS

The GILLO "hammers" are born from the desire to push beyond the limit to which the archer was used to. What if there was a weight that you could infinitely orient and adjust to make balance of your perfect bow? Inspired by the tool of the same name, this weight can be positioned in infinite positions and is available in aluminum or steel. With the possibility of combining them.

THE WHEELS

With the change in World Archery regulations in the 2022 a new way of conceiving positioning is born of weights on the riser. Exceptional! Other customizations possible.

How to create a special weight and that is not the simple unidirectional weight? Here is The Wheels!

DK6

The DK6 weights are specifically 6 weights which can be placed in the special housings in the lower part of any GILLO riser.

From the first riser made by GILLO Gold Medal was possible intervene on weight distribution so that it becomes one absolute customization.

It was born first for recurve bow, then for bare bow.

GHT-10
- Shaped piggy bank
of piglet
- Available only
in Yellow colour

GPD-01-8
- USB pendrive
- Capacity 8GB
- Containing the catalogue
GILLO 2023

GBP-03
- Bow backpack,
from shoulder
- Can hold 2 complete bows

GQV-06
- Three compartments for
arrows
- 4 pockets for accessories
- Adjustable belt included
- Available in version
RH and LH in 5 colors (Blue, Red,
Military Green, Purple and Yellow)
- Extra pocket included

GBP-04

- Bow backpack, from
shoulder
- Can hold 2 complete bows,
full lengths
- Numerous pockets for
accessories
- Tube for arrows included

BINOCULAR GOP-142

- Binocular 10x42
- Short focus
- Weight 585 g
- Waterproof, Fog proof

MONOCULAR GOP-225

- Monocular 8x25
- Weight 180 g
- Protective rubber

SPOTTING SCOPE GOP-336

- 12-36 x 60 scope
- Small size
- Weight 520g
- Rain proof, with protective rubber
- Small tripod included

GUM-07

- Folding umbrella with case
- Available in Yellow color

SCORE BOOK

- Scorebook
- Reversible Targa/Field
- A6 format

GBP-01

- Backpack with 24 liter capacity
- Available in Yellow color
- Adjustable straps

GWB-08

- Aluminum bottle
- Capacity 800ml

GGL-UF-12 Ultra Fletch CA glue

GGL-FF-20 Faster-Fletch Accelerator

GGL-DB-10 Un-Fletch solvent to remove the CA glues

GLU-LI-10 Lithium grease for lubrication
