

App Setup

1) Install Traccar Client app

ANDROID <https://play.google.com/store/apps/details?id=org.traccar.client>

IOS <https://apps.apple.com/us/app/traccar-client/id843156974>

2) Enter settings

F

Identifier is different for each boat, it is: 9000 + bow number.
9001, 9002, etc

<http://85.222.235.241:5055>

High

15

30

20

ON (Android only)

3) Check that phone GPS sensor is switched on.

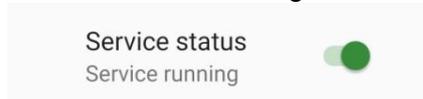

4) Switch service status to **running** and check that boat name comes visible (do this on Saturday): **GPS CHECK** <http://sportrec.eu/ui/#1ffq464>

5) I will help with questions - Tönis Erm, +372 56 669 977, tonis@sportrec.eu

On Race Day

1) Charge the phone battery during the night. Also take the charger with you to boat.

2) Open Traccar Client and switch service status to **running**. You can do this as early as you like, but **service must be running 15 minutes before the first warning signal**.

3) Keep the phone in the charger (GPS uses a lot of battery). Place the phone high, if possible.

4) After finish (of the last race of the day), stop the service. Or the phone will be visible on the shore.
